MULTI-FACTOR AUTHENTICATION (MFA)

SMS Authentication Method
Installation Guide

SMS AUTHENTICATION METHOD

When you first log into UniFI or UniFI 2.0, you will be prompted to set up multi-factor authentication (MFA).

SET-UP TAKES JUST A FEW MINUTES

Step 1

When you click on the UniFI or UniFI 2.0 link from iADS website, you will be redirected to the portal webpage, where you will be asked to enter your **Username***.

The screenshot shows the ACURA login page. At the top, the ACURA logo is displayed. Below it, there is an information icon and a message: "The visual changes we have made in no way affect your online experience. Sign in using your regular username and password." Below this, it states "Multi-Factor Authentication is now active. [Click to learn more.](#)" The main form has a "Username" label above an input field, which is highlighted with a red arrow. Below the input field is a blue "Next" button. At the bottom left, there is a link for "Forgot username?".

Step 2

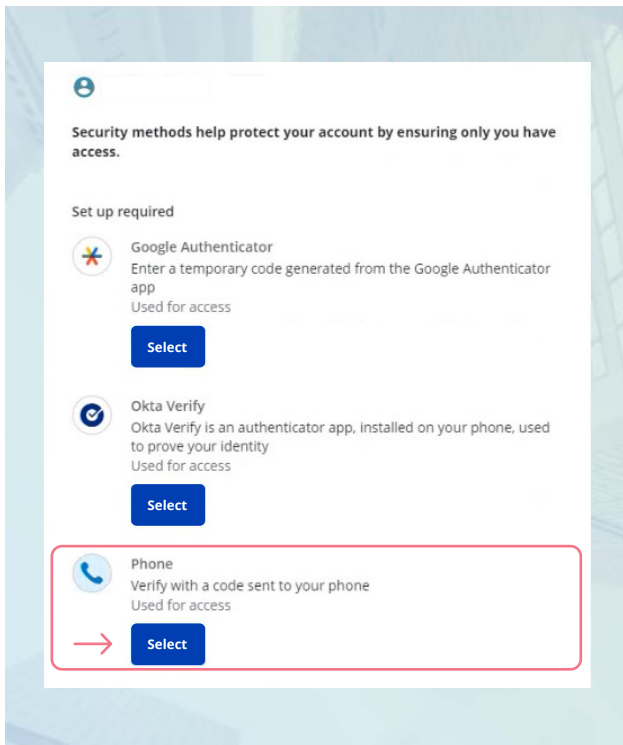

Enter your **Password***.

The screenshot shows the ACURA login page. At the top, the ACURA logo is displayed. Below it, there is a user icon and a "Password" label above an input field, which is highlighted with a red arrow. Below the input field is a blue "Next" button. At the bottom left, there are links for "Forgot password?" and "Back to sign in".

* If you are accessing UniFI or UniFI 2.0 from your (OEM/SSO) Portal, you will not need to put in your username and password. Your step 1 will start at step 3.

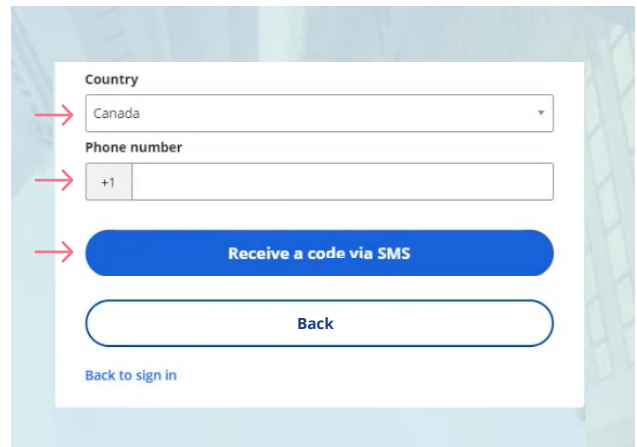

Step 3

Click on the **Select** button in the Phone Authentication section.

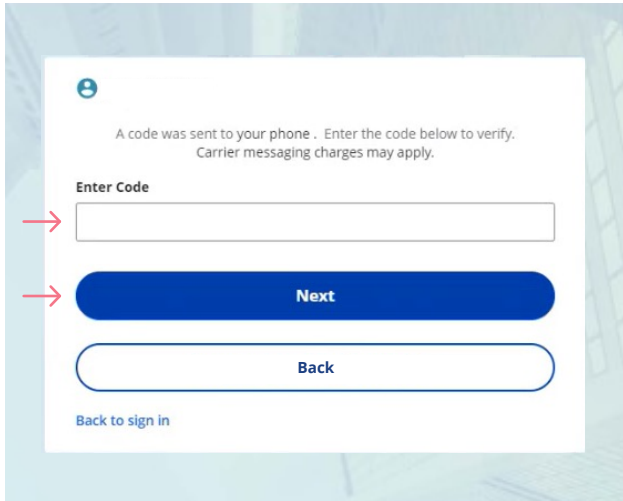

Step 4

Next you will be asked to select the **Country** and enter the **Phone number** where you wish to receive your security code. Then click on **Receive a code via SMS**.

Step 5

Once you have received the unique security code, you will need to **Enter the code** that is given to you and click **Next**.

A code was sent to your phone . Enter the code below to verify.
Carrier messaging charges may apply.

Enter Code

Next

Back

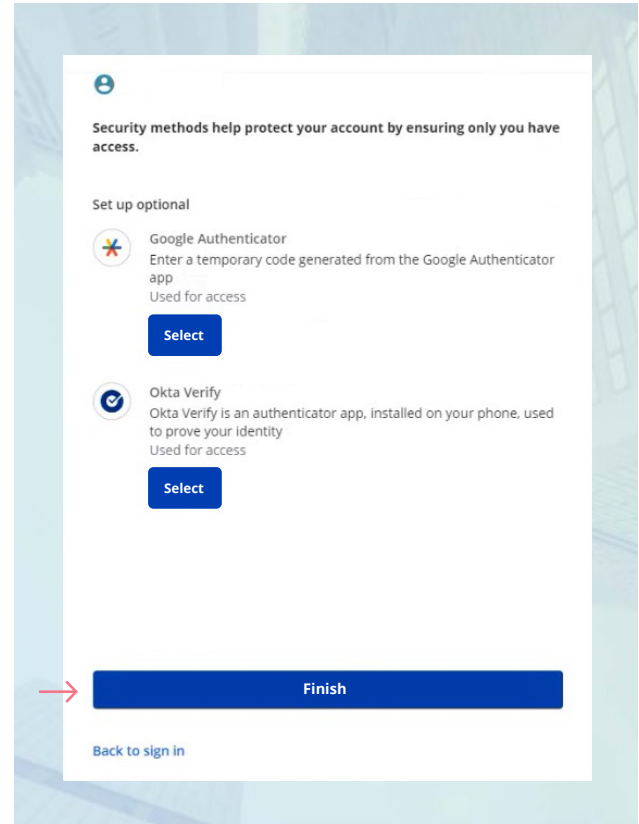

Back to sign in

This screenshot shows a verification screen. At the top, it says 'A code was sent to your phone . Enter the code below to verify. Carrier messaging charges may apply.' Below this is a text input field labeled 'Enter Code'. Two red arrows point to the input field and the 'Next' button. There is also a 'Back' button and a 'Back to sign in' link at the bottom.

Step 6

You have now completed the SMS Authentication set-up and will be taken back to the configuration page.

You can choose to set up an additional MFA method; or click on **Finish** to continue to your UniFI or UniFI 2.0 Portal.

Security methods help protect your account by ensuring only you have access.

Set up optional

- Google Authenticator
Enter a temporary code generated from the Google Authenticator app
Used for access
Select
- Okta Verify
Okta Verify is an authenticator app, installed on your phone, used to prove your identity
Used for access
Select

Finish

Back to sign in

This screenshot shows a screen for setting up optional security methods. It has a heading 'Security methods help protect your account by ensuring only you have access.' and a sub-heading 'Set up optional'. There are two options: 'Google Authenticator' and 'Okta Verify'. Each option has a description and a 'Select' button. A red arrow points to the 'Finish' button at the bottom. There is also a 'Back to sign in' link at the bottom.

Going forward, when you log into the UniFI or UniFI 2.0 Portal, you may be **prompted to provide a unique security code**, which will be sent through SMS (text message).
