MULTI-FACTOR AUTHENTICATION (MFA)

SMS Authentication Method
Installation Guide

SMS AUTHENTICATION METHOD

When you first log into UniFI or UniFI 2.0, you will be prompted to set up multi-factor authentication (MFA).

SET-UP TAKES JUST A FEW MINUTES

Step 1

When you click on the UniFI or UniFI 2.0 link, you will be redirected to the portal webpage, where you will be asked to enter your **Username***.

HYUNDAI

The visual changes we have made in no way affect your online experience. Sign in using your regular username and password.

Multi-Factor Authentication is now active. [Click to learn more.](#)

* If you are accessing UniFI or UniFI 2.0 from your (OEM/SSO) Portal, you will not need to put in your username and password. Your step 1 will start at step 3.

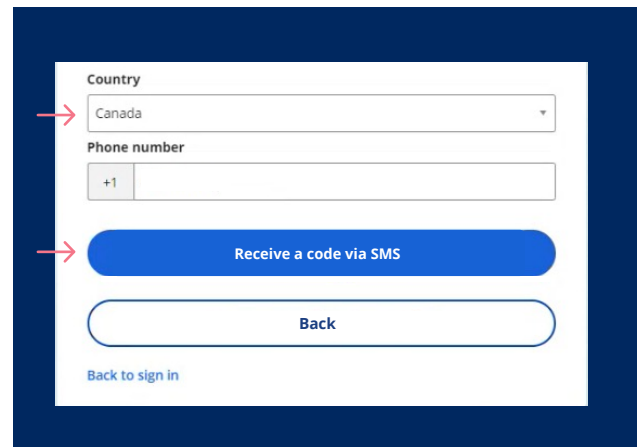

Step 3

Click on the **Select** button in the Phone Authentication section.

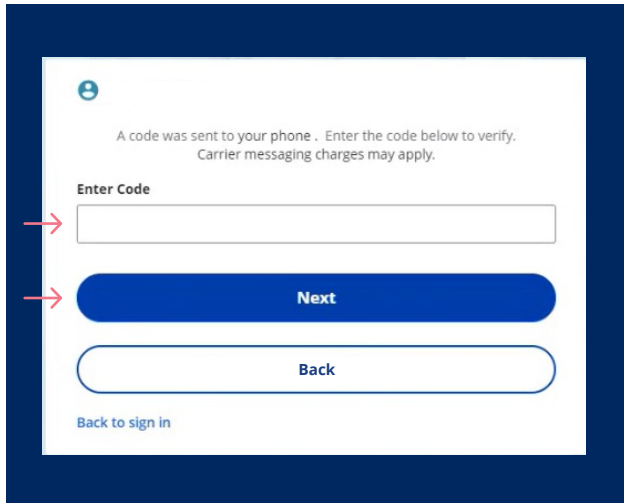

Step 4

Next you will be asked to select the **Country** and enter the **Phone number** where you wish to receive your security code. Then click on **Receive a code via SMS**.

Step 5

Once you have received the unique security code, you will need to **Enter the code** that is given to you and click **Next**.

A code was sent to your phone . Enter the code below to verify.
Carrier messaging charges may apply.

Enter Code

Back to sign in

This screenshot shows a verification screen. At the top, it says 'A code was sent to your phone . Enter the code below to verify. Carrier messaging charges may apply.' Below this is a text input field labeled 'Enter Code'. Two red arrows point to the input field and the 'Next' button. At the bottom, there is a 'Back to sign in' link.

Step 6

You have now completed the SMS Authentication set-up and will be taken back to the configuration page.

You can choose to set up an additional MFA method; or click on **Finish** to continue to your UniFI or UniFI 2.0 Portal.

Security methods help protect your account by ensuring only you have access.

Set up optional

- Google Authenticator
Enter a temporary code generated from the Google Authenticator app
Used for access
Select
- Okta Verify
Okta Verify is an authenticator app, installed on your phone, used to prove your identity
Used for access
Select

Finish

Back to sign in

This screenshot shows a screen for selecting additional security methods. It starts with the heading 'Security methods help protect your account by ensuring only you have access.' Below this is a section 'Set up optional' with two options: 'Google Authenticator' and 'Okta Verify'. Each option has a 'Select' button. At the bottom, there is a large blue 'Finish' button with a red arrow pointing to it, and a 'Back to sign in' link.

Going forward, when you log into the UniFI or UniFI 2.0 Portal, you may be **prompted to provide a unique security code**, which will be sent through SMS (text message).
