Canada's first budget in two years

World

The global vaccination campaign is advancing quickly, and the results are positive, particularly in North America. However, the number of new cases in emerging countries is concerning. The situation in India, the second most populous country in the world with 1.4 billion residents, is a good example and is attracting worldwide attention. As illustrated in the graph on the right, the number of new daily cases in India right now is over 375,000, which makes up about 40% of new cases worldwide. The good news is that the country should soon be receiving aid from other countries to increase availability of vaccines and ventilators. Despite the progress made in developed countries, the global situation remains concerning.

COVID-19 : Important new wave in India

7-day moving average, Data from Bloomberg

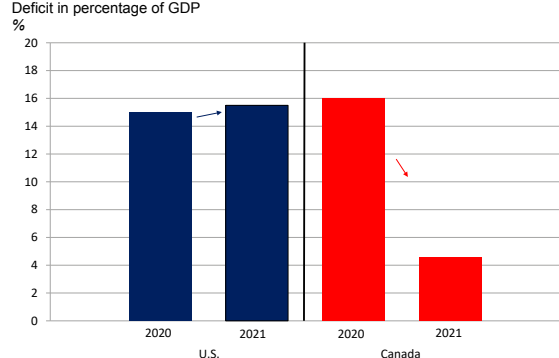

North America

The end of April was marked by the announcement of the first budget from Chrystia Freeland, Canada's Minister of Finance. Unsurprisingly, the focus was on the projected deficit and economic stimulus measures. While the size of the Canadian deficit in 2020 has raised many eyebrows, it should be noted that the size of the deficit as a proportion of GDP is comparable to that of other developed countries (see the U.S. example in the chart to the right). In addition, the expected deficit in the United States in 2021 could be four times higher than in Canada due to the accumulation of large stimulus packages in the U.S., which will extend over the next several years.

North America: Lower proportional deficit for Canada in 2021

Deficit in percentage of GDP

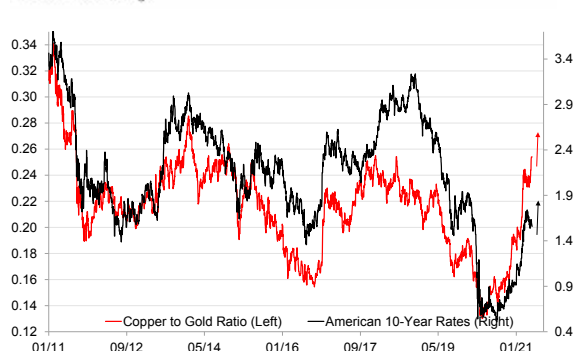

Financial markets

At the start of 2021, we saw a significant increase in interest rates. This hike seems to have stalled over the past several weeks, but many leading indicators are now pointing towards a strong economic recovery accompanied by a potential rise in inflation, which should provide a tailwind for long-term interest rates in the coming quarters. As illustrated in the graph on the right, the ratio for copper (a barometer for economic activity in the global manufacturing sector) to gold (considered a safe-haven commodity) has historically been a good indicator for the trajectory of interest rates. The ratio's sustained rise in recent months is in line with the observed strength of the global economic recovery, and suggests that the U.S. 10-year interest rates will increase to near the 2% level in the coming months.

Financial Markets: Indicators point toward higher interest rates

The benchmark index for each fund is published in the Quarterly Update.

¹ Total net assets of the fund including individual and group contracts.

² The rates of return for the period are non-annualized.

³ Offered only for certain types of contracts.

⁴ Not available in non-registered and TFSA contracts.

⁵ Available in non-registered and TFSA contracts.

⁶ Please refer to the Legal Notices on page 6 for more information about these indexes.

⁷ The frequency of the fund valuation is quarterly. The returns are published in the Quarterly Update.

* Simulation of past returns as if the fund had been in effect for these periods.

Index funds: Simulation of past returns from the return of the index that the fund aims to reproduce.

The above returns are gross returns and do not take into account management and administration fees.

Past performance is not a guarantee of future returns.

Composite indexes (portfolios)

Each portfolio index is composed of a set of benchmark sub-indexes, listed above. These sub-indexes are linked to the portfolios' underlying funds. The weighting used is equal to the asset allocation of the portfolios' underlying funds. The asset allocation varies periodically. The current allocation appears in the *Your range of investment options* document in My Client Space, our secure website, at ia.ca/myaccount.

¹ Rates of return for the period are non-annualized.

² Please refer to the Legal Notices on page 6 for more information about these indexes.

Some portfolio returns are simulated as if they were in effect during the periods shown above.

The above returns are gross returns and do not take into account management and administration fees. Past performance is not a guarantee of future returns.

Guaranteed Investments	Returns as at April 30, 2021 (%)										
	Special 1-day	1 year	2 years	3 years	4 years	5 years	6 years	7 years	8 years	9 years	10 years

NEWS

iA Investment Management Inc. is making changes to general fund-management teams and fixed-income fund-management teams

Please note that iA Investment Management Inc. (iAIM) is making certain changes to its VP structure regarding general fund management and fixed-income fund management. The new structure aligns with the strategic plan, which aims to increase team specialization and continue to enhance client services.

These changes are favourable to team continuity and in line with their responsibilities. iAIM has always been structured as a collaborative organization based on the sharing of ideas among specialists. Portfolios have always been managed by teams, which we firmly believe ensures smooth transitions. We also believe that this structure fosters an integrated approach by specialty and optimizes each specialist's expertise. As with all changes, we will exercise oversight to ensure that the quality of the strategies continues to yield the same value to our clients.

For complete information and the affected funds, please consult the Investment Update of April 22, 2021 – iA Investment Management, available on our secure website, at ia.ca/myaccount.
