Update on the macroeconomy and the markets – Q2 2023

By Sébastien Mc Mahon, M.E.Sc., PRM, CFA

Vice-President, Asset Allocation, Chief Strategist, Senior Economist and Portfolio Manager
Industrial Alliance Insurance and Financial Services Inc.

After years of robust economic growth, there is growing concern among investors about a potential recession on the horizon. As the effects of the global pandemic continue to wane, economists are looking closely at various economic data to determine the likelihood of a downturn.

One major factor contributing to this uncertainty is sticky inflation. Analysts are concerned that central banks' efforts to control inflation may lead to a sharp contraction in growth rates and, eventually, a recession. Central banks plan to tighten until mid-2023 before cutting rates in 2024 to manage inflation expectations. Additionally, there are concerns about pressure on banks due to their balance sheets. Analysts warn that massive liquidity injections from 2020 to 2022 are creating issues for banks as deposits flee, causing an interest rate mismatch on their balance sheets and leading to tighter lending standards and possible credit cycle slowdowns.

In June, the Bank of Canada ended a four-month pause by raising its policy rate by a further 25 basis points, bringing the total increase since March 2022 to 450 basis points. There is a good chance it will hike again over the summer. While April's core inflation measures were not encouraging (with median and trimmed CPI rising by an average of 0.4% over the month), it may have been advisable for the central bank to wait for May's data before raising rates again. The first-quarter GDP growth exceeded expectations at 3.1%, instead of the anticipated 2.3%. However, this higher growth does not necessarily indicate that the economy has entered an excess demand phase, making it uncertain whether the recent policy rate hike to levels not seen in over 20 years was warranted.

In the US, the passage of the Fiscal Responsibility Act averted a catastrophic sovereign default by raising the debt ceiling. Nevertheless, compromises made by the Biden administration, such as resuming student loan repayments for around 40 million Americans, will reduce disposable income by 1% (\$16 billion monthly) and impact federal expenditures by about 0.2% of GDP in 2024, contributing to slower economic growth. The improved banking system situation has restored investor hope. However, challenges remain, including rising interest rates, decreasing market value of bank-held assets, and the debt ceiling increase, which could lead to liquidity problems. While the US economy has shown resilience, it is crucial to remain cautious due to potential future issues in the financial markets and the overall economy.

UK inflation remained above price growth in the US and Europe in May, putting pressure on the Bank of England to raise interest rates despite the potential impact on mortgage holders. Factors contributing to high inflation in the UK include Brexit, surging food costs, labor

shortages, and reliance on natural gas for power and heating. May saw an 8.7% annual increase in the UK's Consumer Price Index, the highest inflation rate among the G7 advanced economies. In contrast, inflation was 4.0% in the US and 6.3% in Germany.

The S&P 500 appears to have exited its bear market phase and re-entered the bull market. Central banks have grown their assets in the first part of the year, despite clear signals about shrinking their balance sheets, which has supported investor risk appetite. While being cautious, the AI theme remains a major contributor to investor optimism, which could lead to a self-sustaining momentum of equities over the next few months. However, there are clear signals from the macro framework, mentioned earlier, which need to be taken into consideration.

The current tightening cycle witnessed across the developed world is arguably one of the most aggressive in history. Jumbo hikes of 50, 75, and 100 basis points have been the norm since summer, and markets are now pricing in leading rates at or above 4% in both Canada and the US by year-end, and above 2.5% in Europe. Central banks have continued their tightening efforts in their fight against inflation. The federal funds rate is currently at 5.25%, while the Bank of Canada's policy rate is at 4.75%. This aggressive tightening has had negative effects on both credit conditions and availability for households and firms.

Sovereign yield curves remain inverted for most of the year, presenting an interesting value proposition due to growth and monetary policy expectations. The S&P 500 seems to have exited its bear market phase and re-entered the bull market. However, when removing what some have called the "magnificent 7" from the S&P 500, the performance of the index aligns more closely with our expectations and with other equity indices.

As we enter the second half of the year, the U.S. dollar is expected to gain increased strength. The month of May established a favorable backdrop for the currency, and with the slower momentum in Europe and China, the U.S. dollar is likely to benefit and maintain its edge, particularly if volatility returns to risk assets.

Over the past month, the Canadian dollar has outperformed the USD, seemingly breaking out of its recent range. This performance has been propelled by stronger 2-year swap rates, economic resilience, and positive momentum in risk assets. However, for now, analysts remain neutral on the CAD, as lasting outperformance for commodity-linked currencies tends to concentrate in periods when the global economic cycle has clearly bottomed. While significant outperformance from the CAD is anticipated over the coming years, it may be premature to put an overweight trade in place at this time.

Global Asset Management

iAGAM is one of Canada's largest investment management firms with over \$100 billion in AUM and more than 170 investment professionals. **iAGAM** offers differentiated, actively managed solutions covering a broad range of asset classes, regions and styles. The investment group is committed to delivering superior

outcomes for investors through strong risk management, analytical rigour and a disciplined, process-driven approach to security selection and asset allocation. **iAGAM** serves institutional clients, as well as individual investors through segregated and mutual funds.

abrdn is a leading active management firm that manages a wide range of assets: developed and emerging market equities and fixed income securities, alternative, multi-asset, real estate and private market investments. The firm leverages the depth and scale of its investment capabilities and its global presence to make better-informed decisions and adapt to a constantly changing world.

The firm believes that markets are inefficient and that superior long-term performance can be achieved by holding good quality stocks trading at reasonable price for the long term.

abrdn, formerly Standard Life Aberdeen PLC, uses a bottom-up process based on a disciplined evaluation of companies which considers quality as the most important criterion, followed by price.

Addenda Capital is a privately-owned investment management firm that looks after pension, private wealth, insurance, corporate and foundation assets. It actively manages a wide range of assets classes including fixed income, equities and commercial mortgages.

Being of the most important multi-assets investment firms in Canada, **Addenda Capital** favours an approach based on fundamental research and thorough risk evaluation that integrates sustainable investing practices. Its mission is to add long-term value through innovation, discipline and integrity, in close partnership with our clients and for a better future.

Founded in 2008 by three seasoned professionals, **AlphaFixe Capital** is a Quebec investment management firm specializing in fixed-income securities that serves mainly institutional clients. The entrepreneurial spirit and vitality that drive **AlphaFixe** are well suited to investors seeking a partner to assist them and overcome the challenges they face. **AlphaFixe's** investment philosophy is based on a rigorous risk management process. The strategic notions of capital preservation and flexible execution serve as a constant guide for **AlphaFixe** and extend also to its internal management models, which are both sophisticated and accessible.

Founded in 1908, **Baillie Gifford Overseas** is an Edinburgh-based independently owned investment management company. Its private partnership structure allows the firm to put its clients' needs first and be home to truly active investors. Its portfolios are shaped by where the best investment opportunities lie, rather than where the index indicates. The firm has a long-term, multi-generational focus which reflects the firm's approach to investing and the stability it provides to its clients.

Baillie Gifford's investment teams process is fundamentally driven and based on collaborative research. The firm believes the best way to generate long-term returns for its clients is to focus on the task of identifying and investing in those companies which have the potential to grow at a faster rate and on a more sustainable basis than peers. Fund management teams conduct rigorous qualitative research to establish whether prospective investments have the competitive, financial and strategic advantage to deliver that potential. Investment ideas are discussed and debated across the investment teams, and the firm is always looking for that novel insight to enhance its collective knowledge. The firm sets no barriers to the imagination of its investors, encouraging fresh perspectives and the use of diverse sources of information.

Beutel, Goodman & Company Ltd. (BG) was founded in 1967 as a privately owned, value-oriented Canadian investment management organization. Majority owned by its employees, **BG** specializes in the management of domestic and global equity, as well as balanced and fixed income mandates for institutional and individual investors.

BlackRock

BlackRock, Inc. is a leader in investment management and advisory services for institutional and retail clients worldwide. **BlackRock** offers a large variety of products to meet clients' needs, including active and index strategies across markets and asset classes.

Founded in 1990 and based in Toronto, **Burgundy Asset Management** is a global investment manager providing discretionary investment management for private clients, foundations, endowments, pensions and family offices. **Burgundy's** approach is based on investing in good companies when they can buy them for less than they are worth and holding them for the long term. Intensive research into individual companies and their management is the critical process that supports our investment decisions.

Established in 1982, **Connor, Clark & Lunn (CC&L)** is one of Canada's largest independent partner-owned money management firms. The firm offers a diverse array of investment services including equity, fixed-income, balanced and alternative solutions. **CC&L** provides professional management of financial assets for pension fund sponsors, capital accumulation plans, corporations, not-for-profit organizations, First Nations, mutual funds and individual investors.

CI Investments is an independent Canadian investment company founded in 1965. It is passionate about providing exceptional service, strong performance and best-in-class, actively managed investment solutions. **CI Institutional Asset Management**, a division of **CI Investments**, offers investment solutions to leading financial institutions, pension funds, endowments, foundations, and family offices. We operate as a multi-boutique firm, with a number of portfolio management teams offering a variety of actively managed fixed-income, balanced, equity, target risk, target date and alternative strategies.

Fidelity Investments Canada ULC is part of Boston-based Fidelity Investments, one of the world's largest providers of financial services. In Canada, **Fidelity** manages substantial mutual fund and institutional assets for institutional clients including public and corporate pension plans, endowments and foundations, as well as other corporate assets on behalf of clients across Canada.

Committed to long-term performance, **Fidelity Investments** selects equities according to a "bottom-up" fundamental investment philosophy and a proven, disciplined approach.

Fiera Capital Corporation is a large, independent, full-service, high quality, strongly capitalized investment management firm. It is driven by an aspiration to constantly deliver optimal performance in everything it does. Its structure promotes excellence within its specialized investment teams by combining the flexible and efficient environment of a multi-style investment manager with the scale of resources offered by one of Canada's leading investment firms. **Fiera Capital** has several hundred employees located in its offices around the world.

FISHER INVESTMENTS® INSTITUTIONAL GROUP

Fisher Investments is an investment adviser serving a global client base of institutional and individual investors including corporate and public pension plans, foundations and endowments, insurance companies, healthcare organizations, governments, investment companies and high net worth individuals. Its founder, Ken Fisher, designed the firm with one vision in mind: putting clients at the forefront and building an investment management firm to support long-term investment objectives.

The firm's investment philosophy is rooted in the firm belief capitalism is the best possible economic structure in this imperfect world. Individuals acting of their own interest in search of profits are forces that ultimately benefit all. Markets are a manifestation of this and a means to participate and financially benefit.

Fisher Investments starts with a top-down investing process and the belief that the most important investing decision is the portfolio's asset allocation—the mix of equities, fixed income, cash and other securities.

Founded in 2008, **Global Alpha** is a Quebec-based investment management firm. They manage solely global and international small capitalization equities.

Global Alpha is an affiliate of Connor, Clark and Lunn Financial Group Ltd. (CC&L), who owns 49% of the organization. The remaining 51% of the firm is owned by six members of the Global Alpha team. This allows them to focus their efforts on portfolio management while CC&L provide non-investment management functions.

Founded in 1990, **IFM Investors** is an Australian investor-owned fund manager which focuses on delivering superior long-term performance through quality portfolios that have a strong risk focus. It is also a pioneer and leader in infrastructure, investing on behalf of institutional investors globally, with over 20 years of experience while also specializing in debt, private equity and public equity investments.

IFM Investors has a long track record of behaving and investing responsibly. It integrates ESG factors at all stages of the investment process by using ESG data alongside traditional management and financial data to find the best suited investment opportunities at any given time.

Invesco, is a leading independent global investment management company, dedicated to helping people worldwide build their financial security. **Invesco** has earned the trust of investors around the world. With fully integrated investment capabilities that span traditional and alternative asset classes, **Invesco** is one of the world's leading names in investment management for institutions and individuals worldwide.

With several hundred investment professionals operating around the world, **Invesco** has a significant presence in the institutional and retail markets across North America, Europe and Asia-Pacific. Invesco's extensive global footprint, high level of diversification and full range of investment capabilities enable it to quickly and effectively meet the diverse needs of its clients, wherever they reside. **Invesco's** single focus on asset management means that its investment and marketing professionals are dedicated to achieving the strongest, most consistent investment performance over the long term.

JARISLOWSKY FRASER

GLOBAL INVESTMENT MANAGEMENT

Jarislowsky Fraser Limited is a Canadian investment management firm owned by The Bank of Nova Scotia. The company was founded in 1955 and has offices across Canada and in New York City.

Jarislowsky Fraser Limited is a long-time leader in the management of pension funds and endowment funds. Most of its institutional clients are corporations, governments and Canadian endowments, but the firm also has a considerable individual clientele. Funds are managed according to a growth at a reasonable price (GARP) approach, and aim to protect capital and achieve long-term growth. The management of absolute risk is a characteristic of **Jarislowsky Fraser's** investment approach. The reference index is not an important concern when constructing portfolios.

Lazard Asset Management is known for its global perspective on investing and years of experience with global, regional and domestic portfolios. With several hundred investment professionals worldwide, **Lazard** offers investors of all types an array of equity, fixed-income and alternative investment solutions from its network of local offices around the world. **Lazard's** team-based approach to portfolio management helps it deliver robust and consistent performance over time, and strong client relationships allow **Lazard** to understand how to employ its capabilities to its clients' advantage.

MAWER

Founded in Calgary in 1974, **Mawer Investment Management Ltd.** (Mawer) is an independent investment management firm.

The firm employs a disciplined, research-driven process and long-term view in the management of global portfolios. Value-added returns are achieved through prudent security selection and portfolio mix based on bottom-up, fundamental analysis. Consistent returns are achieved through a team process which benefits from the breadth and depth of all investment specialists.

Mawer presents a proven investment style over long measurement periods—a style that does not fit easily into either a growth or value category. It does not consider itself a value investor because it looks for companies with strong and improving business fundamentals. Nor does it see itself as a growth investor because it is not exclusively looking for companies with high earnings growth. Its style is best described as “quality at the right price.”

Mawer has an enviable reputation throughout Canada for professionalism, integrity, continuity of management and a highly disciplined approach to investment management.

MFS Investment Management (MFS) offers its services to investors around the world through offices in nine major financial centres. **MFS** applies a uniquely collaborative approach to build better insight for its clients based on three guiding principles: integrated research, global collaboration and active risk management. **MFS** analyzes worldwide investment opportunities from fundamental, quantitative and credit perspectives. Its team and compensation structure ensures collaboration across the organization. Actively managing risk is the responsibility of each member of the **MFS** investment team and drives its decisions and results.

Founded in Vancouver in 1964, **Phillips, Hager & North** is one of Canada's oldest investment management firms. It is a part of the RBC family. As part of RBC Global Asset Management, **PH&N** remains faithful to its origins while evolving in tandem with their clients' increasingly sophisticated needs. **PH&N** manages money for private clients, non-profit organizations and institutional investors (primarily pension plans). It follows a disciplined and conservative approach to investing with a clear focus on the long term. With several decades of investment management experience, **PH&N** has in place a firm set of values and principles and their disciplines have stood the test of many market cycles.

PIMCO

PIMCO is an active fixed income manager dedicated to serving the specific goals and unique needs of Canadian bond investors. One of the largest asset management firms in the world, **PIMCO** has been managing Canadian fixed-income securities for Canadian clients since 1998.

PIMCO offers a unique combination of local expertise, global resources and fixed-income knowledge based on a conservative, value-oriented investment philosophy. Its goal is to outperform client benchmarks consistently over the long term through an investment approach that combines top-down fundamental analysis of the Canadian and global economies, and proprietary bottom-up credit research of individual bonds.

PIMCO offers Canadian clients the best investment ideas from around the world through its global research capabilities, extensive experience and long history of innovation in new financial products and market sectors.

QV Investors Inc. (QV) is a Calgary-based portfolio management firm that manages balanced, Canadian equity, and fixed income portfolios for individuals, not-for-profit organizations, and institutional investors. **QV** is an employee-owned independent investment management firm. Founded in 1996, **QV** has worked to provide consistent investment results. Its name reflects its philosophy of selecting quality investments that offer value and growth to build diversified, low-risk portfolios.

Sprucegrove Investment Management Ltd. is a fully independent firm headquartered in Toronto that specializes in global equity management. **Sprucegrove's** objective is to provide clients with above-average investment performance and superior service over the long term.

The **Sprucegrove** strategy employs a value approach to the management of equities. It emphasizes long term investment and it focuses on the selection of individual common stocks using a bottom-up, research driven approach. Country and sector exposures are a residual of this stock selection process. It is the **Sprucegrove** belief that each investment must be based on thorough internal research, must offer safety of capital, and must promise a satisfactory long-term rate of return. Portfolio holdings must meet **Sprucegrove's** standards of investment quality including a leadership position, a history of above average financial performance, a secure financial position, reputable management, and a growth opportunity in terms of sales, earnings, and share price. The **Sprucegrove** valuation criteria include: normalized price earnings multiple, price to book value and dividend yield.

Founded in 1937, Baltimore-based **T. Rowe Price Group, Inc.** is a global investment management organization that focuses solely on investment management and related services. The organization provides a broad array of mutual funds, subadvisory services, and separate account management for individual and institutional investors, retirement plans, and financial intermediaries. The company also offers sophisticated investment planning and guidance tools. **T. Rowe Price's** disciplined, risk-aware investment approach focuses on diversification, style consistency, and fundamental research.

Asset Management

TD Asset Management (TDAM) is a highly diversified North American investment management firm with leading market positions in active, quantitative and passive portfolio management. Since its foundation, **TDAM** has developed a skillset that includes not only the traditional and alternative investment capabilities, but also the increasingly important areas of compliance, governance and comprehensive risk management capabilities.

As part of the TD Bank Financial Group, **TDAM** is able to draw on the strengths and resources of one of the largest North American financial institutions, striving to deliver value for its clients, every day.

Franklin Templeton Investments Corp. is a Canadian investment management company. It has offices worldwide and is a leader in the management of international investments. **Franklin Templeton Investments Corp.** believes the best way to truly benefit from the long-term advantages offered by equity investments is to make the most of international geographic diversification.

Templeton manages its equity funds according to an investment methodology that focuses on value and patience. This involves rigorous fundamental analysis of a company's business to determine its economic worth based on projected future earnings or asset value potential.

UBS is committed to providing private, institutional and corporate clients worldwide, as well as retail banking clients in Switzerland, with superior financial advice and solutions while generating attractive and sustainable returns for shareholders. Its strategy centers on its Wealth Management and Wealth Management Americas divisions and its leading universal bank in Switzerland, complemented by its Global Asset Management and Investment Bank divisions. These divisions share three key characteristics: they benefit from a strong competitive position in their target markets, are capital-efficient, and offer a superior structural growth and profitability outlook. Capital strength is the foundation of its success.

WALTER SCOTT

Established in 1983, **Walter Scott & Partners Limited (Walter Scott)** manages global equity portfolios on behalf of institutional investors around the world. Throughout their history, they have successfully combined traditional investment values with an innovative approach to research. The defining characteristics of how **Walter Scott** invests are its in-house research, a global perspective, a long-term investment horizon and team-based decision-making. **Walter Scott's** investment team members work closely together in an open environment and use a disciplined analysis method to seek out companies that meet stringent qualitative and quantitative investment criteria. The management of each portfolio relies on the skills, judgment and experience of the entire investment team.

Walter Scott's mission is to provide its clients with appreciable real returns per year over the long term. Environmental, social and governance issues have been integral to the company research since the firm's establishment in 1983. Every member of the team is responsible for embracing these crucial, fundamental attributes.

WELLINGTON MANAGEMENT®

Wellington Management traces its roots back to 1928, when the founder established the first balanced mutual fund in the United States. Today, **Wellington Management** has a significant presence and long-term track record in nearly all sectors of the global securities market with client assets managed of more than USD 1 trillion. The investment model is based on comprehensive capabilities and rigorous proprietary research. Each investment team has freedom of philosophy and process, while benefiting from the resources of a large, global firm. Investment teams conduct research through fundamental, ESG, quantitative, macro and technical lenses.

Wellington Management is committed to minimizing the environmental impact of its operations by promoting sustainable practices and active dialogue among its employees while also making sustainable investing and ESG research.

ATTITUDE **portfolios**

ATTITUDE portfolios represent the pre-built solution that evolves according to the investor's life cycle AND risk profile, two key elements in retirement planning.

Their main feature lies in the dynamic asset evolution over time. ATTITUDE portfolios automatically adjust on a quarterly basis*, to optimize investment growth potential while respecting the degree of risk associated with the investment horizon and the member's investment profile. The asset allocation becomes more conservative as the investor nears his retirement target date.

The following chart shows the new composition of the portfolios as at June 30, 2023.

ATTITUDE portfolios target a higher long-term return while mitigating risk over the life cycle of the solution through investment diversity and the integration of several portfolio managers. The portfolios are composed of several investment funds which cover the main asset classes, including diversified alternative funds using strategies based among other things on real assets. Alternative investments improve the asset mix of the portfolios because they have the attractive feature of low correlations with traditional asset classes, such as bonds and publicly traded stocks.

As the target retirement period approaches, the asset allocation automatically changes every three months*, to become less risky. This adjustment decreases the allocation towards equity funds in favour of income funds. This method helps to reduce risks related to market fluctuations. The quarterly evolution of the portfolios' composition continues for ten years after retirement. The purpose of this is to limit risk into retirement while allowing the portfolios to continue to perform and generate earnings.

The following pages present the returns for each ATTITUDE portfolio. For the current detailed breakdown by asset class and fund for each of the portfolios, as well as their target allocations, please refer to the document Your range of investment options in My Client Space, our secure website, at ia.ca/myaccount.

* In the event of significant market changes, the manager reserves the possibility to partially adjust the portfolios or postpone adjusting them to a later date to manage less liquid investments and minimize potential negative impact to plan members.

COMPOSITE INDEXES (PORTFOLIOS)							

Each portfolio index is composed of a set of benchmark sub-indexes, listed above. These sub-indexes are linked to the portfolios' underlying funds. The weighting used is equal to the asset allocation of the portfolios' underlying funds. The asset allocation varies periodically. The current allocation appears in the *Your range of investment options* document in My Client Space, our secure website, at ia.ca/myaccount.

¹ Rates of return for the period are non-annualized.

² Please refer to the Legal Notices at the end of this publication for more information about these Indexes.

Some portfolio returns are simulated as if they were in effect during the periods shown above.

The above returns are gross returns and do not take into account management and administration fees. Past performance is not a guarantee of future returns.

Group Investment Funds

The returns of the funds presented in this document are gross returns, i.e., before the deduction of all fees pertaining to group investment funds.

LifePath Retirement Index I (BlackRock)

Fund available upon request

Fund Code: 884
Inception date: June 2012

Investment Advisor
BLACKROCK

Objectives of the Fund

- Seeks an appropriate balance of investment return and price stability given the portfolio's time horizon
- Allows to capture diversified investment opportunities
- Is designed for participants who retired between 2008 and 2012

Risk level

Underlying Fund

BlackRock CDN LifePath Retirement Index Fund I

Total net assets: \$25.3 million

Group Savings
and Retirement

Commentary

The underlying fund, BlackRock CDN LifePath Retirement Index Fund I is designed for participants who have retired between 2008 and 2012. It aims to maximize total return with a risk level that may be appropriate for the Fund's particular timeframe and its goal is to provide an appropriate blend of income and inflation protection. The manager uses quantitative methods to approximate an appropriate risk level for average investors at various stages in their working lives. These methods serve as a guideline to determinate the proportions invested in each asset classes (Foreign Equities, Canadian Equities, Canadian Bonds, Canadian Real Return Bonds, Real Estate and Alternative Investments). Indexed investments are used to get the desired exposure to these asset classes.

Investment Advisor
BLACKROCK

Objectives of the Fund

- Seeks an appropriate balance of investment return and price stability given the portfolio's time horizon
- Allows to capture diversified investment opportunities
- Is designed for participants who will retire starting in 2058

Risk level

Underlying Fund

BlackRock CDN LifePath 2060 Index Fund

Total net assets: \$15.8 million

Group Savings and Retirement

Commentary

The underlying fund, BlackRock CDN LifePath 2060 Index Fund is designed for participants who will retire starting in 2058. It aims to maximize total return with a risk level that may be appropriate for the Fund's particular timeframe, and its goal is to provide an appropriate blend of income and inflation protection. The manager uses quantitative methods to approximate an appropriate risk level for average investors at various stages in their working lives. These methods serve as a guideline to determinate the proportions invested in each asset classes (Foreign Equities, Canadian Equities, Canadian Bonds, Canadian Real Return Bonds, Real Estate and Alternative Investments). Indexed investments are used to get the desired exposure to these asset classes.

Commentary

The fund aims to achieve high total investment return. The fund uses a dynamic asset allocation strategy and invests primarily in underlying funds. These underlying funds will generally invest in a mix of equity securities, fixed-income securities and money market instruments.

From inception to its target date in 2020 and for a period of approximately 20 years thereafter, an increasing proportion of the Fund's assets will gradually be invested in securities of fixed income and money market funds. At the time the Fund's asset allocation is substantially similar to that of the Fidelity ClearPath® Income Portfolio, it is expected that the Fund will be combined with that portfolio.

Group Savings and Retirement

Commentary

The fund aims to achieve high total investment return. The fund uses a dynamic asset allocation strategy and invests in underlying Fidelity Funds that invest primarily in a mix of equity securities, fixed-income securities and money market instruments.

From inception to its target date in 2045 and for a period of approximately 20 years thereafter, an increasing proportion of the Fund's assets will gradually be invested in securities of fixed income and money market funds. At the time the Fund's asset allocation is substantially similar to that of the Fidelity ClearPath® Income Portfolio, it is expected that the Fund will be combined with that portfolio.

Commentary

The Fund seeks to maintain excellent protection of capital and a high level of liquidity, while maximizing the total return. It is composed essentially of quality securities, with a maximum term of one year, guaranteed by the provinces, governments and some companies. The management style focuses on interest rate forecasts which are based on careful analysis of the economic outlook.

Total net assets: \$145.0 million

Group Savings
and Retirement

Commentary

The Fund is managed according to a management style primarily based on securities selection and issuers. The manager also integrates interest rate anticipation in his management process. The fund is characterized by a short and medium term maturity, which minimizes the impact of interest rate fluctuations while generating a good income.

AlphaFixe ESG Fund – Green Bonds, Series F

Total net assets: \$1.3 million

Group Savings
and Retirement

Commentary

Green Bonds enable capital-raising and investment for new and existing projects with environmental benefits. The green bond market aims to enable and develop the key role that debt markets can play in funding projects that contribute to environmental sustainability and climate change mitigation.

The Fund offers an opportunity to participate in the development of a low-carbon economy, without diminishing performance objectives. Investments must meet the green bond selection criteria established by the AlphaGreen proprietary validation process, which ensures the positive environmental impact of each bond. These criteria are based on the Green Bond Principles and the standards of the Climate Bonds Initiative. Bonds that are considered green are either self-labeled or climate-aligned bonds, the latter being companies or projects from which 90% of the revenues are generated by activities with positive impact on the environment. In addition to an environmental integrity, the Fund offers a geographic diversification based on a fundamental approach focused on selecting good quality credits and capital preservation.

Group Savings and Retirement

Commentary

The Fund's approach in bond management is based on interest-rate movement forecasts, derived from analyses of macroeconomic trends. The management of the duration and the yield curve positioning are the main sources of added value compared to the benchmark. Sector and security selection also contribute to add value. On occasion, the manager may add securities denominated in foreign currencies, real return bond or other special situations likely to improve the portfolio's return or to reduce volatility.

Carbon Intensity Measurement

The IA Responsible Fossil Fuel Free Bond Fund is designed to have a materially lower carbon intensity than its benchmark. The carbon intensity of the Fund measures direct and indirect greenhouse gas emissions* from the individual corporate bond issuers in the Fund.

Weighted Average Carbon Intensity

Corporate holdings using available carbon intensity data as at December 31, 2021.

Fund data availability is 29.6% and 47.6% for the benchmark. Data sources: iAIM and Bloomberg.

*Emissions include Scope 1 and Scope 2 Emissions. Note that data only includes corporate holdings that have carbon intensity data available.

Total net assets: \$56.4 million

Group Savings and Retirement

Commentary

The Fund is primarily comprised of bonds, and other high-quality debt securities issued by the private sector and federal, provincial and municipal governments. Security selection is mainly based on the quality of the securities in the portfolio and anticipated movement in interest rates. The Fund invests in a socially responsible manner by aiming to exclude securities of issuers whose main activity is the extraction, production or distribution of fossil fuel energy, but also those working in the weapon, adult entertainment, cannabis, gambling, nuclear power, alcohol and tobacco industries. To maximize the social and environmental impacts of the Fund, it will aim to invest in various types of sustainable and sustainability-linked bonds to the extent that these securities are in line with the fund's strategy without compromising its risk/return profile. Moreover, the fund aims to identify and typically avoid higher ESG risk issuers.

Commentary

The Fund aims to provide investors with a moderate real rate of return primarily through interest income. Returns in excess of income will be gained through duration, yield and sector management. The Fund invests primarily in a diversified portfolio of bond issued or guaranteed by Canadian governments (federal, provincial and municipalities) and corporations.

Commentary

To achieve the Fund's investment objectives, the manager invests in high quality Canadian corporate bond and government bond issued in Canadian or U.S. dollars. The average term to maturity of the portfolio is managed within strict guidelines, typically between seven and twelve years. In addition to the standard investment restrictions imposed by securities legislation, the value of any one investment at month-end must not exceed 15% of the Fund's net assets at market value. This does not apply to government or government-guaranteed debt instruments.

Group Savings and Retirement

Commentary

The fundamental investment objective of the Fund is to earn interest income and provide reasonable stability of capital by investing primarily in Canadian and non-Canadian fixed income securities.

The fund utilizes several yield-enhancing strategies commonly known as "Plus" strategies. These strategies include mortgages, North American and global high yield bonds, and emerging market debt (EMD), all of which serve to augment and diversify the universe of bonds holdings in an institutional portfolio.

PIMCO Canada Canadian CorePLUS Bond Trust

Total net assets: \$72.8 million

Group Savings and Retirement

Commentary

PIMCO is a "core-plus" manager. Their goal is to add value by consistently outperforming the benchmark by tapping traditional and non-traditional sectors of the fixed income markets, while maintaining overall risk similar to that of the benchmark.

Risk factors to which PIMCO is overweight or underweight include: duration; yield curve; sectors of the Canadian bond market, including government bond, provincials and corporate bond; and credit quality. In addition, PIMCO allocates a small portion of its CorePLUS portfolios to out-of-index risk factors comprised of the firm's best ideas from around the global bond markets, which include international fixed income, currency, Canadian and non-Canadian inflation-linked bond, Canadian and non-Canadian high yield, emerging markets, liquidity and volatility strategies.

Commentary

The Fund's fundamental investment objective is to earn interest income and provide reasonable stability of capital by investing primarily in Canadian and foreign fixed income securities.

Despite a reduced sensitivity to interest rate movements, this fund reports a high current yield as it has the latitude required to invest in bank loans as well as municipal, provincial, corporate and, to a lesser extent, federal bonds. Foreign securities held in the Fund are covered against currency fluctuations.

and Retirement

Commentary

The manager's strategy is based on the detailed analysis of corporate securities. The security selection approach focuses on companies that post strong fundamentals and that offer a higher level of liquidity. The fund manager seeks to add value primarily using bottom-up security selection strategies and top-down sector allocations.

Commentary

The Fund is primarily composed of bond with long term maturities (10 or more years). Management of the fund is based primarily on interest rate movements resulting from our analysis of macroeconomic trends. Management of the duration is the primary source of value added, whereas the choice of sectors and securities selection are also sources of value added. The manager could occasionally add securities denominated in foreign currencies, real return bond or other special situations that can contribute to enhancing the return of the portfolio or reduce its volatility.

PIMCO Monthly Income Fund (Canada)

Total net assets: \$690.1 million

Group Savings and Retirement

Commentary

The Fund aims to optimize current income while respecting the principle of capital conservation and prudent investment management. Long term capital appreciation is a secondary objective. The Fund invests primarily in a diversified portfolio of fixed income securities that are not denominated in Canadian dollars and with a variety of maturities.

The Fund can invest up to 50% of its total assets in high-yield securities ("high risk bond") that have been rated or, if they are not rated, in securities of comparable quality. The Fund can invest up to 20% of its total assets in securities and instruments that are economically linked to the emerging markets. There is no limit as to the number of securities denominated in currencies in which it can invest. As a general rule, the Fund limits its exposure to currencies (of securities denominated in currencies other than the Canadian dollar) to 10% of its total assets. The Fund can also resort to targeted derivatives, such as options, futures and forward contracts, and swaps. The average duration of this Fund's portfolio usually varies between zero and eight years.

AlphaFixe ESG Fund – Floating Rate Bank Loans

Total net assets: \$57.3 million

Group Savings and Retirement

Commentary

The Fund offers a high current yield solution in the face of a potential interest rate rise and of low interest rates through a rigorous process based on a fundamental credit approach and on capital conservation. In order to reduce the risk associated with interest rates and offer protection against inflation, the Fund is invested in senior secured loans with a credit rating of better than B-.

The Fund may invest in securities denominated in currencies other than Canadian dollars, which exposes investors to currency fluctuations. However, according to investment instructions, the Fund must have a currency coverage ratio of more than 96%, thus limiting the impact of exchange rate fluctuations.

The maximum invested in an economic sector of the stock market is limited to the higher of 20% of the Canadian equity sector of the Fund and twice this sector's weighting on the S&P/TSX Composite Index.

The average duration of the bond portion of the Fund must be situated between 50% and 150% of the duration of the FTSE Canada Universe Bond Index.

Risk level

Total net assets: \$559.2 million

Group Savings
and Retirement

Commentary

The investment strategy of the Fund focuses primarily on a judicious allocation between Canadian and foreign equities and fixed income securities. Given the importance of this allocation, a Committee is responsible for making these decisions in accordance with their views on the economy and the markets. In addition, to further diversify the portfolio, stock selection is entrusted to multiple managers with different management styles. As such, the Committee also allocates assets across the different management styles, based on market conditions.

Commentary

The fundamental investment objective of the Balanced Fund is to enhance long-term capital value by investing in cash and cash equivalents, fixed-income securities and Canadian, U.S. and international equity securities. The Fund's advisor uses a value-based approach to select equity investments which means the advisor looks for stocks that are undervalued in relation to the asset value or the issuer's earnings power. The Fund's fixed-income portfolio is invested in a diversified group of Canadian government and Canadian corporate bonds. The Fund's asset mix will normally fall within a range of 60% equity securities and 40% fixed-income securities.

Commentary

The manager's objective is to add value over the benchmark index through long term asset allocation, thereby reducing volatility to a minimum. It is a diversified portfolio, invested in fixed income securities, and Canadian, U.S. and international equities. Asset allocation is reviewed each week by the strategic investment committee. The revision process includes discussions on local and international macroeconomic factors, as well as the relative valuations of the fixed income securities and equities.

Commentary

The Fund offers a globally managed solution that combines leading sustainable investment managers. The integration of environmental, social, and governance (ESG) factors will contribute to identifying high-quality, sustainable companies and a better assessment of significant risks and opportunities that may affect the long-term value of investments. This fund invests in sustainable bonds, including green bonds that help finance the climate transition and shares of companies with a low carbon footprint. This fund offers investors the opportunity to contribute to developing a low-carbon economy, prioritize climate change issues and contribute to the achievement of the United Nations' Sustainable Development Goals. This strategy's target allocation is 60% in equity securities and 40% in fixed-income securities.

MFS Balanced Growth Fund

Total net assets: \$72.2 million

Group Savings
and Retirement

Commentary

The Fund aims to provide investors with a superior real rate of return through both capital appreciation and income by investing in a diversified portfolio of Canadian and global (U.S. and international) equities, fixed income and cash investments. The stocks are chosen for their growth potential. This means the stock's expected earnings growth is faster than the expected earnings growth for the overall market. MFS adjusts the Fund's asset mix percentages periodically to take advantage of market opportunities, but stays within the following ranges: stocks 54 to 66%, fixed income 25 to 45% and cash 0 to 15%.

Phillips, Hager & North Balanced Pension Trust

Total net assets: \$32.6 million

Group Savings and Retirement

Commentary

The PH&N balanced approach follows a three part investment philosophy.

1. Investments in high quality common stocks represent the best vehicle for creating wealth over the long term.
2. Wealth preservation and income objectives are best met by balancing common stock and bond investments.
3. The cyclical nature of markets requires the timely adjustment of the mix of common stock and bond investments.

PH&N's goal is to take advantage of market opportunities by anticipating the best performing asset class at each stage of the business cycle. Through increasing exposure to these classes the overall return of the portfolio can be enhanced.

Commentary

The portfolio is divided in two parts: asset allocation decision and security selection. The asset allocation is done following a disciplined multi-step process (meetings and discussions regarding asset allocation dynamics, review potential changes and formulate a recommended allocation). Afterward, each sub-portfolio manager is assigned a specific portion of the overall Fund and is responsible for all security/sector selection within that component.

Commentary

The Fund is primarily composed of common stocks of large companies that offer attractive earnings and dividend potential. The investment strategy used to manage this fund is based on a process that combines the bottom-up and top-down approaches. First, the manager uses the top-down approach, which involves carrying out a macroeconomic analysis to determine the economy's best performing sectors. Then, the manager follows the bottom-up approach, which allows him to select securities according to a value style, giving preference to superior quality Canadian stocks offering regular dividends.

Commentary

The Fund aims to achieve a balance between high dividend income and capital growth through the application of a highly disciplined value investing approach emphasizing capital preservation, and a focus on absolute return and risk. The Fund seeks to identify and invest in a diversified portfolio of high quality common stocks, preferreds, income trusts and interest bearing securities. The Fund will hold a range of 20 to 45 primarily Canadian securities, although the Fund may also invest in foreign issues. In selecting holdings, the manager relies exclusively on the firm's internal research. The firm's highly disciplined value investing approach results in a Fund that performs defensively in volatile markets, while aiming to capture a significant portion of the market's upside. In addition, the Fund aims to deliver a yield greater than that of its benchmark.

Total net assets: \$170.4 million

Group Savings and Retirement

Commentary

The philosophy underlying the Fund is that capitalization-weighted market indices are not efficient and that portfolio optimization techniques focusing on minimizing expected return volatility can provide market-like returns over the long term with less volatility than the market capitalization-weighted index.

The manager seeks to construct a diversified portfolio with less return volatility than the S&P/TSX Composite Index. The Fund is expected to outperform in declining market environments. Note that the tracking error will be high relative to the index.

Commentary

The Fund seeks long-term capital appreciation primarily through investments in common shares and other equity securities of Canadian issuers with medium to large capitalization. The Fund's strategy uses a fundamental, bottom-up and disciplined approach which attempts to buy the best economic value in the market regardless of what sector the issuer operates in. The Fund's adviser aims to identify stocks that are undervalued relative to the business value of the issuer.

Commentary

The Fund's investment strategy uses a bottom-up, fundamental approach designed to deliver the Fidelity Canadian equity research team's best ideas. The portfolio manager constructs a concentrated portfolio based on fundamental research inputs where active sector and capitalization allocation are the result, primarily, of bottom-up stock selection. The foundation of this research is our large team of research analysts dedicated solely to the Canadian equity market.

Each analyst is assigned an industry group in the S&P/TSX Capped Composite Index and is responsible for rating the top stock ideas within his or her sector. The portfolio manager is responsible for constructing the portfolio and ensuring that the strategy adheres to the stated investment guidelines.

Total net assets: \$18.7 million

Group Savings
and Retirement

Commentary

The Fund is a core strategy that combines fundamental and quantitative stock selection inputs in a risk-controlled framework. Portfolio relative risk is controlled by maintaining "super" sector allocations in line with those of the S&P/TSX Capped Composite Index.

The strategy invests in stocks that are highly rated by both Fidelity fundamental equity research analysts and by proprietary quantitative research models. Combining these two independent alpha signals along with a "super" sector neutral discipline to portfolio construction helps to create a portfolio that is concentrated, but that actively controls risk at both the security selection and portfolio construction levels.

Commentary

The Fund is primarily invested in medium and large capitalization companies, and a small proportion of the portfolio is invested in small capitalization companies. The manager looks for securities that present a good growth profile, but is concerned about the price that he pays to acquire them. He relies on a "self-generated" cash flow model to select securities, and pays special attention to risk management in terms of sectors, capitalizations and primary positions in the benchmark index. The Fund remains diversified in terms of stock market sectors and can occasionally contain foreign securities.

Commentary

The investment objective of the is to generate returns that exceed the S&P/TSX Composite Index by 2% per year over a market cycle.

To reach this objective, the portfolio manager applies a continuous quantitative evaluation of all investment opportunities based on fundamental criteria across stocks and industries.

Proprietary portfolio construction framework dynamically evaluates growth opportunities across all stocks in the investable universe on a daily basis while maintaining value characteristics that are similar to the benchmark.

Fiera Canadian Equity Ethical Fossil Fuel Free Fund

Total net assets: \$59.2 million

Group Savings and Retirement

Commentary

The fundamental investment objective of the Fund is to provide long-term returns through both capital appreciation and distribution of income. To achieve this objective, the Fund will invest mainly in high-quality and attractively valued common stocks and other equity securities of Canadian issuers. It follows a conservative and disciplined investment approach with an emphasis on downside protection and capital preservation. The Fund applies a fossil-fuel-free exclusion, while integrating environmental, social and governance risk factors (ESG), as well as ethical considerations established by the Fund.

Fiera Capital's investment process reflects its belief that organizations that successfully manage ESG factors create more resilient businesses and assets and are better positioned to deliver sustainable value over the long term. The manager's objective is to build a diversified portfolio with a significantly reduced carbon footprint and apply an ethical filter in its investment selection process. Based on these criteria, a company will be deemed ineligible if categorized in the energy or utilities sector that generate power from fossil fuels or if it derives more than 10% of its revenue, either directly or indirectly, from the following products or services: adult entertainment, alcohol, cannabis, tobacco, firearms, gambling, military contracting and nuclear power.

Commentary

The Fund's investment philosophy is to look for growth at a reasonable price. Thus, it seeks to obtain growth of capital while reducing the level of risk. The Fund is invested in three groups of securities. More than half the portfolio is invested in group I securities, which represent large cap companies that are leaders in their field, in non-cyclical industries. Slightly less than one third of the portfolio is invested in group II securities, i.e., companies belonging to cyclical industries and which carry out their activities on international markets. Finally, less than 10% of the portfolio is invested in group III securities, which contains smaller-cap companies or special situations.

Jarislowsky, Fraser Fossil Fuel Free Canadian Equity Fund

Total net assets: \$19.7 million

Group Savings and Retirement

Commentary

This fund responds to the need for a core, institutional-caliber investment vehicle that allows investors to exclude investments in fossil fuel companies. Like all Jarislowsky Fraser's strategies, the Fund focuses on quality companies with the ability to create value through sustainable business models and strong corporate governance practices. The Fund is designed to deepen the alignment with a growing segment of investors' values and world view. The portfolio's carbon footprint is actively managed to deliver a materially reduced emission intensity. Consistent with an investment philosophy as long-term investors in high-quality businesses, the manager is committed to sustainable investing and integrating environmental, social and governance (ESG) factors into the fundamental investment analysis.

The Fund will exclude the GICS energy sector, with the exception of renewable energy entities as defined by the managing firm. The Fund will also exclude non-energy-sector companies with significant exposure to or that have a significant amount of value attributable directly or indirectly to fossil fuels.

Commentary

The Fund aims to provide investors with a superior real rate of return, primarily through long term capital appreciation by investing in a diversified portfolio of Canadian equities. The stocks are chosen for their growth potential. This means the stock's expected earnings growth is faster than the expected earnings growth for the overall market. Canadian Equity (MFS) Fund is comprised of 35 to 55 securities, generally selected from the largest one hundred companies in the Canadian market although smaller companies with outstanding growth potential are also included. Emphasis is usually on non-cyclical companies, due to their stable long term earnings potential.

Commentary

The Fidelity True North Fund seeks long term capital appreciation by investing in equity securities of growth-oriented companies at reasonable prices. The first screen criteria is the price/earnings growth (PEG ratio). However, PEG alone tells the manager little about the overall attractiveness of an investment opportunity. After the first screen is done, the focus goes on the balance sheet. The manager needs to see solid cash flow generation and earnings yield. In terms of risk management, the manager manages relative to the benchmark but will take the necessary deviations in order to generate the attractive alpha (value added vs. index). The manager is well supported by the analysts of Team Canada.

Commentary

This Fund's investment objective consists in long term capital growth through investments made primarily in equity securities from mainly Canadian small and medium cap companies.

The Fund invests primarily in equity securities of various Canadian companies traded on organized exchanges, such as common shares, convertible securities or securities that enable the purchase of these types of shares.

Commentary

QV Investors Inc. believes investing is the process of buying ownership stakes in businesses run by managers we want as long term partners. They seek to buy our investments at a price calculated to deliver a rate of return superior to the return on equity of Canadian corporations. They believe the study of the business environment can enhance returns by putting values, companies, credit and cultures in a global or thematic context. The elements of the portfolio management are as follows: - Quality, Value, Growth and Diversification - and relate to the management of portfolio risk. Quality is analysis of the integrity of management and corporate finance. Value is the calculation of a security's price relative to its earning power and inflation. Growth in capital is the objective. Diversification is the means to modify risk.

Commentary

The Fund uses a combination of top-down analysis for geographic allocation with bottom-up analysis and quantitative analysis for security selection. The U.S. equity portion invests in equity securities from issuers considered to be leaders in their respective industries that possess above average earnings growth and stability, management quality and experience, as well as overall market share. The international equity portion uses a multifactor investment approach through a quantitative investment process which aims to identify and invest in securities that provide exposure to multiple drivers of returns (factors) for enhanced performance potential and diversification benefits.

Commentary

The philosophy underlying the Fund is that capitalization-weighted market indices are not efficient and that portfolio optimization techniques focusing on minimizing expected return volatility can provide market-like returns over the long term with less volatility than the market capitalization-weighted Index.

The manager seeks to construct a diversified portfolio of securities of companies located around the world, including emerging countries, with less return volatility than the MSCI ACWI Index. The Fund is expected to outperform in declining market environments. Note that the tracking error will be high relative to the index.

Commentary

The principal investment objective of the strategy is to seek long-term capital growth, primarily through investments in the global developed-market equity universe, while maintaining an overall risk profile that is lower than the market. The strategy seeks to minimize absolute risk by utilizing quantitative investment tools, while enhancing capital growth potential via fundamental stock selection.

The manager seeks to construct a diversified portfolio with less return volatility than the index. Based on this approach, the Fund is expected to outperform in declining market environments. Note that the tracking error will be high relative to the index.

Sprucegrove Global Pooled Fund

Total net assets: \$15.5 million

Group Savings and Retirement

Commentary

Sprucegrove aims to offer their clients a higher than average long term return. Their investment strategy for equities rests on the actual value of securities. It emphasizes long term investments and favours individual securities using the bottom-up approach, backed by its research. Country and sector selection are secondary in this selection method. Portfolio securities must meet their quality standards: above-average return for long periods, solid financial foundation, recognized management and potential growth of sales, earnings and price. Their evaluation criteria include normalized price/earnings ratio and price/book value ratio.

Commentary

The Fund is managed in a value style based on fundamental data. The portfolio is built using a bottom-up approach of selecting high quality companies available at a price below their intrinsic value and the investment research integrates ESG factors. The management team combines quantitative and qualitative research with experience and human judgment to assess each company, its financial position and its management team. The Fund includes between 40 and 80 stocks which represent the best opportunities identified by the manager.

Commentary

The Fund seeks to outperform the MSCI All Country World Index by investing in discounted companies that are being avoided or overlooked due to uncertainty or complacency. The investment approach is based on intensive fundamental research focused on companies with unique assets and whose opportunities for improving returns are misunderstood by the market. The portfolio is opportunistic in its stock selection and focuses on out-of-favor companies with the potential for positive sentiment shift. The strategy is to look for uncorrelated investment drivers and balance sheet flexibility which have the potential to provide diversification and staying power throughout the business cycle.

Commentary

The Fund's manager follows a high-conviction investment strategy that targets companies that not only provide long-term capital growth, but also focus on climate risk mitigation and adaptation. The manager's investments are focused on five climate pillars: low-carbon electricity, energy efficiency, low-carbon transportation, water and resource management, and climate-resilient infrastructure. The portfolio manager leverages the expertise of Wellington Management, one of the world's largest investment management firms, to capture these investment opportunities.

Underlying Fund

Jarislowsky, Fraser Fossil Fuel Free Global Equity Fund

Total net assets: \$7.4 million

Group Savings
and Retirement

Commentary

The Fund's investment philosophy is to look for growth at a reasonable price. Thus, it seeks to obtain growth of capital while reducing the level of risk. The Fund is designed to allow investors to avoid exposure to fossil fuels, while investing in a diversified portfolio managed by a global investment team and focused on quality, all with a lower carbon footprint (ranging from 60% at 80%).

The Fund focuses on quality companies with the ability to create value through sustainable business models and good corporate governance practices. The investment process integrates environmental, social and governance (ESG) factors to evaluate the quality of a company and to take an engaged ownership approach. The Fund will exclude the GICS energy sector, with the exception of renewable energy entities as defined by the firm. The Fund will exclude other companies which have a significant portion of revenues linked to fossil fuels. The portfolio's carbon footprint is actively managed to deliver a materially reduced emission intensity. Carbon intensity often reflects asset intensity with low-quality business models and additional risks.

Commentary

The Fund invests in equity securities from around the world. The Manager allocates capital to the best global opportunities, which may include both large and small capitalization companies. Treasury bills or short-term investments, not exceeding three years to maturity, may also be used from time to time. In order to achieve his investment strategy objectives, the Manager systematically creates a broadly diversified portfolio of wealth-creating companies with excellent management teams bought at discounts of their intrinsic values. The Manager employs a highly disciplined, research-driven, bottom-up process and a long-term holding period to allow for investor recognition or corporate growth, and to minimize transaction costs.

Commentary

To achieve long-term capital growth, the manager invests primarily in a diversified portfolio of common stocks in companies in the world's largest industrialized countries outside Canada, including the United States, and countries in Europe and the Far East, including Japan and Australia. The Fund's investment process is primarily based on fundamental research and stock selection of financially strong companies that have also created competitive advantage, including the integration of strong management and ESG practices.

Commentary

The Fund seeks long-term capital appreciation by investing primarily in a diversified portfolio of equity and equity-related securities of larger cap companies listed on the world's stock markets. The portfolio may include investments in the securities of companies listed on the stock exchange of developed and developing countries.

Environmental, Social and Governance (ESG) factors are embedded into the investment process by analysts and portfolio managers. In-house ESG Specialists provide quantitative tools, research and subject matter expertise to support analysts and portfolio managers.

Commentary

This long-term actively managed global equity growth strategy employs bottom-up stock selection and differs significantly from the stock market index with the intention of delivering significantly higher total returns. The portfolio is diversified across stocks, industries and regions, with broad holding sizes of 0.5%, 1% or 2%, depending on the team's level of conviction in the company's prospects. The portfolio managers focus on companies which they believe offer above-average profit growth and they invest with a long-term (5-year) perspective. The Fund's three dedicated investment managers draw on a combination of their own investment ideas and those of the various investment teams of Baillie Gifford to produce a portfolio that typically holds 70–120 stocks.

Sustainable Growth (Baillie Gifford)

Fund Code: 387
Inception date: December 2020

Investment Advisor

Management team composed of several managers

Objectives of the Fund

- Targets long-term capital appreciation through investments in equity securities from around the world
- Conforms to an investment horizon that is long enough to endure the volatility of the market values

Responsible investment criteria

- Management firm is a signatory of the United Nations Principles for Responsible Investment (PRI)
- Environmental, social and governance (ESG) factors integrated in the investment management process
- Fossil-fuel-free
- Other exclusions: tobacco, weapons, gambling, alcohol and cannabis producer, child labour
- Low carbon footprint

Baillie Gifford Global Stewardship Equity Fund

Total net assets: \$18.0 million

Group Savings and Retirement

Commentary

The Fund aims to generate superior returns by making long-term investments in responsible growth businesses around the world. The investment analysis focuses on the upside potential for companies which demonstrate good stewardship, and also seeks to enhance the positive contribution of business over time through a programme of targeted engagement with company management. While ESG risks are mitigated via explicit sin sector exclusions, the vast majority of research effort is expended identifying ESG opportunities. Baillie Gifford's core belief is that companies that are a net benefit to society, which balance the interests of all stakeholders, and which exhibit a responsible culture are more likely to prosper in the long run. As a result, investing sustainably maximises chances of delivering better returns.

Although the integration of ESG factors in the investment process focuses on identifying opportunities, the manager formally applies exclusion screens. The Fund will not invest in any companies that derive more than 10% of their annual revenues from the production of tobacco, armaments or alcohol, gambling or adult entertainment-related activities and fossil fuel extraction. The manager screens companies against the principles of the U.N. Global Compact covering areas human rights, labour rights, environmental safeguards, bribery and corruption.

Commentary

The manager takes a top-down approach to portfolio management that is dynamic and can adapt to changing market conditions. It develops its market forecast and makes asset allocation decisions based on a wide range of data inputs it classifies into three categories called "drivers": economic, political and sentiment. It then uses the result of this analysis to determine what it believes is the most advantageous blend of country, sector, size and style factors. Asset allocation decisions account for most of the manager's performance. This asset allocation is supported by a fundamental analysis of securities.

Global Alpha Group Global Small Cap Fund, Series A

Total net assets: \$12.0 million

Group Savings and Retirement

Commentary

The Fund seeks to maximize long-term total return through investments in global small capitalization stocks. The firm's investment style is characterized as core with a growth style bias. It's driven by bottom-up security selection and based on fundamental analysis. The investment philosophy is based on identifying quality companies with unrecognized growth potential. They use a global thematic perspective while minimizing factor risk. The strategy consists of a concentrated portfolio of 50-70 global small capitalization stocks, with generally low turnover.

Global Alpha integrates environmental, social, governance (ESG) factors into the investment analysis. They use a proprietary scoring methodology and incorporate these scores when analyzing companies. The firm also monitors the carbon footprint of its portfolios.

Commentary

The Fund uses a multifactor investment approach through a quantitative investment process which aims to identify and invest in securities that provide exposure to multiple drivers of returns (factors) for enhanced performance potential and diversification benefits. The Fund manager is continuously looking for ways to take advantage of return factors that have been proven by the literature to generate positive long-term expected alpha.

Commentary

The Fund is composed primarily of shares in large multinational companies that have shown global leadership in their sector and that have a minimum capitalization of US\$1 billion. These companies generally have sustained growth, high returns on equity, a dominant position in world markets and a solid balance sheet. As for the approach advocated by the Fund manager, it gives preference to companies that benefit from the superior growth of economies other than those of North America and companies present in industrial sectors that do not exist in America. In addition, emphasis is placed on non-cyclical companies operating in countries that offer significant export advantages.

Total net assets: \$59.4 million

Group Savings and Retirement

Commentary

The Fund aims to make long term investments primarily in companies outside of North America. The amount invested in a country depends on the economy, investments and opportunities offered on each region's economic market. The Fund's strategy essentially focuses on the economic foundations of companies that have a good management team and stable cash flows, generate dividends and trade below their intrinsic value. The manager uses a very disciplined approach, based on research, which favours securities selection according to the bottom-up approach. The portfolio has a long term investment horizon, which can be seen by its low turnover rate, and therefore minimizes transaction costs.

Commentary

The Fund invests primarily in equities of companies whose operations lie outside of the U.S. and Canada. The fund will primarily be invested in high-quality companies with above-average, sustainable earnings growth that are trading below their expected earnings growth or cash flow growth rates. This fund is generally comprised of 60 to 80 securities. The objective is to outperform the Morgan Stanley Capital International, Europe, Australasia and Far East (MSCI EAFE) Index (Net Dividends Reinvested).

Commentary

The Fund aims to provide a superior real rate of return, primarily through long term capital appreciation, by investing in a diversified portfolio of U.S. equities. Stocks chosen are considered to be either undervalued in relation to their historical price, industry competitors and/or the overall market, or have prospects for above average earnings growth. At least seventy-five percent of the Fund will normally be invested in companies included in the S&P 500 Index. This fund is generally comprised of 70 to 100 securities. The objective is to outperform the S&P 500 Index (CAD\$).

Commentary

The portfolio manager uses a bottom-up approach to select securities presenting lower than average prices but higher earnings growth, than peers. Quantitative filters are applied to the investment universe in order to rapidly focus attention on the most promising securities. The manager then applies his qualitative judgment combined with some top-down views to select those companies seen as leaders in their respective industries that possess above average earnings growth and stability, management quality and experience, as well as overall market share.

Commentary

The primary objective of the U.S. Equity Fund is to seek growth opportunities in industries otherwise unavailable to domestic investors. Thus, cyclical stocks tend to be avoided, as these are readily available in Canada. This approach contributes to the diversification of any Canadian based portfolio, avoids duplication and provides the framework for a comprehensive equity strategy. The focus is generally on the large capitalization multinationals in order to maximize liquidity and minimize currency risk. The focus is also on companies that have consistent growth records, high returns on invested capital and dominant market positions. The Fund accepts both registered and non-registered assets.

Commentary

The Fund aims to make long term investments in U.S. equities. The Fund's strategy essentially focuses on the economic foundations of companies that have a good management team and stable cash flows, generate dividends and trade below their intrinsic value. The manager uses a very disciplined approach, based on research, which favours securities selection according to the bottom-up approach. The portfolio has a long term investment horizon, which can be seen by its low turnover rate, and therefore minimizes transaction costs.

MFS U.S. Equity Core Fund

Total net assets: \$27.8 million

Group Savings and Retirement

Commentary

The Fund aims to provide a superior real rate of return, primarily through long term capital appreciation, by investing in a diversified portfolio of U.S. equities. Stocks chosen are considered to be either undervalued in relation to their historical price, industry competitors and/or the overall market, or have prospects for above average earnings growth. At least seventy-five percent of the Fund will normally be invested in companies included in the S&P 500 Index. This fund is generally comprised of 70 to 100 securities. The objective is to outperform the S&P 500 Index (CAD\$).

Commentary

The Thematic Innovation Fund is a U.S. equity fund with a thematic investment style that invests in companies from all sectors benefitting from technological advances or prospering in a perpetually changing environment. The investment strategy focuses not strictly on investing in technology itself, but instead on targeting companies that are benefitting from changes caused by technological innovations and avoiding those that will be negatively impacted. The 100 to 120 securities that make up the fund were strategically chosen from over 700 companies that benefit from the influence of the investment themes chosen by the portfolio manager.

Commentary

The Fund seeks long-term capital appreciation primarily through investment in common stocks of well-established large- and medium-cap blue chip companies with potential for above-average earnings growth. Current income is a secondary objective for this strategy. The investment philosophy is based on fundamental research to identify long-term growth opportunities and construct a diversified portfolio of around 100-150 stocks of companies with strong management teams, durable and sustainable earnings and free cash flow growth.

Environmental, Social and Governance (ESG) factors are embedded into the investment process by analysts and portfolio managers. In-house ESG Specialists provide quantitative tools, research and subject matter expertise to support analysts and portfolio managers.

Commentary

Given the inefficiency of markets, the manager believes that competitive long-term returns are achieved by identifying high-quality stocks at attractive valuations and holding them for the long term. It is their belief that sound fundamentals drive stock prices over time. They employ a fundamental bottom-up investment approach based on a rigorous and disciplined proprietary research effort which originates with direct company due diligence visits.

They hold absolute return to be of the utmost importance over the long term and are benchmark-aware, but not benchmark-driven.

Commentary

The Fund aims to invest in an actively managed portfolio of emerging market stocks. Emerging market companies are companies which are listed, incorporated, domiciled or conducting a significant portion of their business in emerging markets, and the Fund may invest in companies of any size or in any sector. The management team invests with a long-term perspective (5 years) and has a strong preference for growth. Managers are looking for significant upside in each stock that they invest in. The process is driven by rigorous, fundamental, bottom-up analysis undertaken by the dedicated emerging markets team. The fund managers draw on this analysis, as well as insights gleaned from discussions with all of Baillie Gifford's global investors, to produce a portfolio that typically holds 60–100 stocks.

Group Savings and Retirement

Commentary

The Fund's investment philosophy is based on the conviction that the understanding, management and allocation of risk are fundamental to creating a good portfolio. The Fund's strategy allows investors to take advantage of a risk premium by investing in stock markets, bond markets and commodities according to a process based on balanced risk allocation. More specifically, the team selects the asset that is best suited to this strategy, allocates it based on exclusive risk management techniques and then uses an active positioning process to improve expected returns. The primary objective is to create a portfolio that will generate good returns in various economic environments (recession, non-inflationary growth, inflationary growth).

BlackRock CDN Global Developed Real Estate Index Fund, Class D

Total net assets: \$3.6 million

Group Savings and Retirement

Commentary

BlackRock uses an "index" approach to manage this fund. The advantage of an index approach is that costs are generally lower, it provides broad diversification by investing in about 300 of the largest REIT companies in the world. To closely track the FTSE EPRA/NAREIT Developed Index, BlackRock invests in all securities in the index very close to their actual index weights.

Group Savings and Retirement

Commentary

The investment philosophy and process of the Fund provides a growth at a reasonable price (GARP) style. The manager takes a long term view in investment selection and has low turnover in their portfolios. With this philosophy their buy/sell discipline is based on the long term fundamentals of a company/property type and less on a short term price target.

Lazard Global Listed Infrastructure (Canada) Fund

Total net assets: \$58.4 million

Group Savings and Retirement

Commentary

Infrastructure is the basic facilities, services and installations needed for the functioning of a community or society. Lazard believes that infrastructure assets have a number of investment characteristics that make them attractive for investors. These include the long life of the assets, low risk of capital loss and inflation-linked returns. The Lazard Global Listed Infrastructure (Canada) Fund allows investors to access such opportunities by investing in companies listed on global stock exchanges. The Fund will seek to reduce foreign currency risks through the use of derivative instruments, thereby limiting the impact of currency movements on the Fund.

Diversified Fixed Income Alternatives

Fund available only for contracts that meet certain criteria.

Fund Code: 333
Inception date: March 2020

Investment Advisor

Management team composed of several managers

Objectives of the Fund

- The Fund aims to invest most of its assets in private debt and commercial mortgage fund units. It therefore aims to hold a diversified portfolio mainly composed of private debt securities and commercial mortgages to provide additional income associated with this type of investment while preserving long-term capital. The composition of the Fund may vary in a controlled manner according to performance, investment opportunities that arise and liquidity constraints of asset classes and funds.

Investment style

Active management with an emphasis on income

Investment limits

	Min.	Max.
Short term	0%	5%
Traditional fixed income	10%	30%
Commercial mortgages	20%	60%
Private debt	20%	60%

These limits will apply once the portfolio construction period has ended given the capital deployment in these alternative asset classes could take up to 18 months.

Risk level

Total net assets: \$197.7 million

Group Savings and Retirement

Commentary

The Fund's strategy is mainly oriented towards a judicious allocation of alternative asset classes, mainly commercial mortgages and private debt securities. These alternative investments, of a more complex and sophisticated nature, have different properties from traditional fixed income securities. They increase portfolio diversification by improving the risk-adjusted return profile. The Fund allows investors to take advantage of the benefits of these asset classes, such as the liquidity premium and a wider range of investment opportunities, normally confined to the universe of very large institutions.

Underlying Funds

- UBS (Lux) Real Estate Funds Selection-Global
- BlackRock CDN Global Developed Real Estate Index Fund, Class D
- Money Market Fund

Total net assets: \$59.3 million

Commentary

The target allocation of the Fund is 75% in the UBS fund, 20% in the BlackRock fund and 5% in the Money Market fund. In order to offer diversified exposure to key global real estate markets, UBS Asset Management allocates the Fund's assets among various high-quality specialized institutional fund managers offering different management styles and strategies. Investments are selected by a team of UBS Asset Management managers. Tactical overweighting and underweighting is the product of research activities and are based on the points of view of UBS Global Real Estate Research House. Allocation in the Americas is focused in the U.S. with exposure in Canada. Exposure in Europe is largely weighted in favour of the strongest and most defensive markets in the region, with an overweighting in the U.K.

BlackRock fund uses an index approach to manage its fund. To do so, it invests in all securities comprising its reference index in weightings that match the index's weightings as closely as possible.

Fund available only for contracts that meet certain criteria.

Fund Code: 334
Inception date: March 2020

Investment Advisor

Management team composed of several managers

Objectives of the Fund

- The Fund Manager aims to invest most assets in real estate funds, infrastructure funds and private equity funds. He therefore targets to build a diversified portfolio, mainly composed of alternative assets to take advantage of their potential benefits. The composition of the Fund may vary in a controlled manner according to performance, investment opportunities that arise and liquidity constraints of asset classes and funds.

Investment style

Assets favouring a good balance between the income and capital appreciation inherent in the various alternative asset classes

Investment limits

	Min.	Max.
Short term	0%	5%
Traditional fixed income	10%	30%
Real estate	25%	65%
Infrastructure	10%	50%
Private equity	5%	30%

These limits will apply once the portfolio construction period has ended given the capital deployment in these alternative asset classes could take up to 36 months.

Risk level

Low	Low to moderate	Moderate	Moderate to high	High

Total net assets: \$406.5 million

Group Savings and Retirement

Commentary

The Fund's strategy is mainly oriented towards a judicious allocation of alternative asset classes, mainly real estate, infrastructure and private equity. These alternative investments, of a more complex and sophisticated nature, have different properties from traditional fixed income securities or listed stocks. They increase portfolio diversification by improving the risk-adjusted return profile. The Fund allows investors to take advantage of the benefits of these asset classes, such as the liquidity premium and a wider range of investment opportunities, normally confined to the universe of very large institutions.

Beutel Goodman Canadian Equity Fund

Total net assets: \$42.0 million

Group Savings and Retirement

Commentary

As bottom-up, value investors, Beutel Goodman invests in companies trading at discounts to their business value. Business value is defined simply as the present value of sustainable free cash flow. The manager believes that business value is best determined by conducting their own internal research on portfolio candidates, employing a global research platform. The manager works from a foundation that stocks purchased at a discount to business value provide a margin of safety. This, combined with a focus on quality companies with stable, growing businesses with strong balance sheets, should avoid capital loss and provide important downside protection.

Commentary

The Fund manager achieves sustainable returns and low volatility by investing in a concentrated, yet diversified, portfolio of high-quality companies, which as a result of unique competitive advantages, are able to generate stable and strong return on invested capital (ROIC) with little dependence on financial leverage, grow shareholder wealth through superior and consistent long term rates of return and preserve capital.

Group Savings and Retirement

Commentary

The objective of the Global Equity Small Cap Fund is to make long term investments in equities which belong to small companies around the world. To do so, the Fund's strategy is based on small cap value stocks and especially on the economic foundations of companies. The manager focuses on companies that have a good management team and stable cash flows, generate dividends and trade below their intrinsic value. The manager uses a very disciplined approach, based on research, which favours securities selection according to the bottom-up approach. The portfolio has a long term investment horizon, which can be seen by its low turnover rate, and therefore minimizes transaction costs.

Fiera U.S. Equity Tax Exempt Fund

Total net assets: \$38.5 million

Commentary

Fiera Capital's team-based approach focuses on identifying the basic engines of economic change and leading companies best positioned to exploit these opportunities. Combining this goal with a process that continually reduces overall portfolio risk and that adheres to specific valuation criteria creates a high-quality, predominantly large capitalization U.S. growth portfolio. The ultimate objective is to identify exceptional growth opportunities within those sectors that they expect to generate positive cash flow and earnings growth as the identified longer term themes unfold.

Composite indexes (portfolios)								

Each portfolio index is composed of a set of benchmark sub-indexes, listed above. These sub-indexes are linked to the portfolios' underlying funds. The weighting used is equal to the asset allocation of the portfolios' underlying funds. The asset allocation varies periodically. The current allocation appears in the *Your range of investment options* document in My Client Space, our secure website, at ia.ca/myaccount.
