**Objectives of the Account**

- The Global Diversified (Loomis Sayles) Account reflects the performance of the IA Clarington Loomis Global Allocation Fund.
- Aims to diversify risk between asset classes, and to combine growth with current income by investing in global securities.
- Suits a medium to long term investment horizon.

**Investment style and other characteristics**

- Style: Assets that favour a good balance between the various classes
- Combines a concentrated global equity portfolio with a high conviction U.S. and global fixed income allocation.
- Security selection is driven by bottom-up fundamental research.
- Managers look for valuation disparities to position the portfolio where the greatest risk/reward opportunities lie which typically runs counter to macro trends.

# Canadian Stock Small Cap (Fidelity) Account

Series IV Genesis Plus

## Risk level

Launch date: December 2005

## Portfolio manager

Fidelity Investments

Hugo Lavallée, CFA

## Objectives of the Account

- The Canadian Stock Small Cap (Fidelity) Account reflects the performance of the Fidelity Canadian Opportunities Fund.
- Seeks long term capital growth through investments in small and medium size capitalization Canadian companies, and conforms to investment horizons that are sufficiently distant to tolerate the volatility of the market values.

## Investment style and other characteristics

- Fund invested in companies that offer a possibility of long-term growth and whose stocks are trading at prices that reflect good value.
- Can invest in all capitalizations, but the manager favours small and medium capitalization securities whose risks are alleviated through diversification of the portfolio.
- Can invest up to 30% of its assets in foreign companies and can hold cash and fixed income securities.

## Credited return

100% of the net return of the underlying fund, less current annual fees.

Current annual fees: 0.00%

Michal Marszal

**Objectives of the Account**

- The Global Health Care (Renaissance) Account reflects the performance of the Renaissance Global Health Care Fund.
- Fund invested primarily in U.S. companies which are engaged in the design, development, manufacturing, and distribution of products or services in the health care sectors.
- Aims to significantly outperform over the long-term by capitalizing on growing global health care expenditure and innovation.

**Investment style and other characteristics**

- The Fund uses a bottom-up fundamental approach, combined with an understanding of key scientific, medical, regulator and economic trends affecting the global healthcare industry, to invest in innovative high-quality companies.
- Fund invested in a diversified portfolio of securities in the medical technology, biotechnology, health care, and pharmaceutical sectors.

Global Asset Management

Team - iAGAM

Objectives of the Account

Optimize the asset allocation to provide attractive long-term return potential while minimizing risks through an actively managed approach to investment diversification.

To optimize the risk/return relationship, in addition to its fixed income securities and equities, the Fund includes such assets as commercial mortgages, private debt, real estate and private equity & infrastructure, which offer various advantages, include

Strategy focused on balancing the various asset classes.

Smoothed Return

The net credited rate for the Smoothed Return Diversified Account for a given year is equal to the declared rate for the Smoothed Return Diversified Fund (the Fund), less management fees.

Before the end of each calendar year, the Fund declared rate will be set for the forthcoming calendar year. This declared rate is based on returns earned on the Fund assets to which the company applies a smoothing formula. This formula amortizes the major fluctuations in returns (positive and negative) and provides a stable, lowvolatility declared rate from year to year. The declared rate for the Fund should never vary more than 0.5% from one year to the next.

The net rate credited for the SRDA is subject to a minimum of 0% and a maximum of 8.5%. If, in a given year, the net credited rate is capped at 8.5%, the portion of the return that exceeds 8.5% for that year will be retained in the fund and used in subsequent years to increase the credited rate.

Guaranteed Credited Rate<sup>1</sup>

This table shows the guaranteed rate after deduction of current annual fees.

Period	Guarantee
2022	3.25%
January 1, 2023 and thereafter	Declared rate for the Fund less management fees

Market Value Adjustment (MVA)

Some types of transactions may trigger a market value adjustment (MVA). To find out the current MVA factor, advisors can refer to the Rate Schedule – Life Insurance available in the Document Centre in Advisor Centre.

Common shares

The common share portfolio is invested primarily in the shares of large capitalization companies around the world. The portfolio is also well diversified across several sectors of the economy in order to diversify risk while taking advantage of various growth opportunities.

Government and corporate bonds

The government and corporate bond portfolio targets geographic diversification through credit rating and maturity. For the entire bond portfolio, we aim for an average duration of between 5 and 15 years and an average investment grade credit rating.

Alternative assets

Commercial mortgages

The commercial mortgage portfolio consists primarily of mortgages on multi-residential, retail, industrial and office properties. Our goal is to build a diversified portfolio through a rigorous selection process.

Private debt

We primarily target mid-term and diversified investments like infrastructures and favour high-quality borrowers. Private debt is not traded in public markets and its yield is higher than comparable corporate bonds.

Real estate investments

iA Financial Group owns and manages an impressive and well-diversified portfolio of real estate assets. This asset class provides a stable income base as well as protection against inflation.

Private equity and infrastructure

Capital and infrastructure investments are made in unlisted companies around the world, mainly in renewable energy, transportation and telecommunications. Generally, they offer superior returns and a lower volatility profile relative to public equities.

Preferred shares

Preferred shares are an asset class that provides dividends which are generally stable and predictable over time. The selection of preferred shares is based on the following principles: the level and stability of the dividends over time, the sector of exposure and the quality of the issuer.

<sup>1</sup> In December of each year, the credited rate established for the upcoming year will be published in the Rate Schedule – Life Insurance available in the Document Centre of the Advisor Centre.
