## Bond Account

### Series IV Plus

As at September 30, 2023

#### Asset mix of the FTSE Canada Universe Bond Index by types of bonds

#### Commentary

The Bond Account reflects the performance of the FTSE Canada Universe Bond Index<sup>1</sup>. Established in 1947, the Canada Universe Bond Index<sup>1</sup> is the broadest and most widely used measure of performance of marketable government and corporate bonds outstanding in the Canadian market, providing the benchmark performance standards for Canadian fixed-income investments. The Index is composed of several hundred bonds, primarily federal and provincial and, to a lesser degree, municipal and corporate.

<sup>1</sup> Please refer to the Legal Notices at the end of this publication for more information about the Index.

#### Investment Advisor

Management team composed of several managers

Establishment date: December 2005

#### Risk level

#### Objectives of the Account

- The Fund is suitable for investors who prefer low investment risk and have a mid to long term time horizon
- The Fund is suitable for investors seeking diversification across the fixed income portion of their portfolio
- The Fund is suitable for investors that wish to receive regular interest income

#### Investment style

Index

#### Credited return

100% of the return of the index, less current annual fees.

## U.S. Stock Account

### Series IV Plus

As at September 30, 2023

#### Asset mix of the S&P 500 Index by industrial group

#### Commentary

The U.S. Stock Account reflects the performance of the S&P 500 Index<sup>1</sup>, the most widely used indicator in the investment industry to judge the performance of the U.S. stock market. Created in 1923, this Index is composed of 500 securities primarily listed on the New York Stock Exchange. These securities were not selected because of their size, but for their capacity to accurately represent over 90 industrial sectors of the U.S. economy.

<sup>1</sup> Please refer to the Legal Notices at the end of this publication for more information about the Index.

#### Investment Advisor

Management team composed of several managers

## Commentary

The Global Diversified (Loomis Sayles) Account reflects the performance of the IA Clarington Loomis Global Allocation Fund, T8 Series. Combines a concentrated global equity portfolio with a high conviction U.S. and global fixed income allocation. Security selection is driven by bottom-up fundamental research. Managers look for valuation disparity in the market place to position the portfolio where the greatest risk/reward opportunities lie which typically runs counter to macro trends.

## Commentary

The Canadian Stock (Fidelity) Account reflects the performance of the Fidelity True North® Fund, A Series. The Fund seeks long term capital appreciation by investing in equity securities of growth-oriented companies at reasonable prices. The first screen criteria is the price/earnings growth (PEG ratio). However, PEG alone tells the manager little about the overall attractiveness of an investment opportunity. After the first screen is done, the focus goes on the balance sheet. The manager needs to see solid cash flow generation and earnings yield. In terms of risk management, the manager manages relative to the benchmark but will take the necessary deviations in order to generate the attractive alpha (value added vs. index). The manager is well supported by the analysts of Team Canada.

## Investment Advisor

Maxime Lemieux

## Commentary

The Canadian Stock Small Cap (Fidelity) Account reflects the performance of the Fidelity Canadian Opportunities Fund, A Series. Before investing in a company, the Fund manager focuses on its fundamental characteristics, namely its financial situation, potential growth and earning possibilities. The Fund invests in companies which, in the manager's opinion, offer a possibility of long term growth and whose stocks are trading at prices that reflect good value. The Fund can invest in all capitalizations, but favours small and medium capitalization securities whose risks are alleviated through diversification of the portfolio. It can invest up to 30% of its assets in foreign companies and can hold cash and fixed income securities.

### Commentary

The Global Dividend (Dynamic) Account reflects the performance of the Dynamic Global Dividend Fund, A Series. The Fund seeks to provide long term capital growth through investment in a diversified portfolio consisting primarily of equity securities of businesses located around the world. The portfolio managers searches the globe for well-managed companies capable of initiating or growing their dividends and that are trading below their intrinsic value. The managers apply a bottom-up analysis to find companies with healthy or improving balance sheets and with a clearly understood dividend policies. Foreign currency exposure is actively hedged to help control currency risk.

## Commentary

The Global Stock (iA) Account reflects the performance of the IA Clarington Global Value Fund, A Series. The Fund uses a combination of top-down analysis for geographic allocation with bottom-up analysis and quantitative analysis for security selection. The U.S. equity portion invests in equity securities from issuers considered to be leaders in their respective industries that possess above average earnings growth and stability, management quality and experience, as well as overall market share. The international equity portion uses a multifactor investment approach through a quantitative investment process which aims to identify and invest in securities that provide exposure to multiple drivers of returns (factors) for enhanced performance potential and diversification benefits.

 Barclays PLC  
 SCOR SE

Top 10 holdings represents 36.52% of the underlying fund's net assets

## Commentary

The European Stock (Fidelity) Account reflects the performance of the Fidelity Europe Fund, A Series. The Fidelity European Fund seeks long term capital appreciation by investing in equity securities of growth-oriented companies at reasonable prices. The investment approach is clearly bottom-up, fully leveraging Fidelity's internal research. The country allocation is a result of the stock picking process, not an opinion on economic growth, interest rates and other macroeconomic statistics. Earnings growth and attractive valuations are the two major stock selection criteria. The risk control is absolute (the manager does not pay attention to the benchmark). He will not hold a stock just because it accounts for a significant percentage in the benchmark.

## Investment Advisor

Matt Siddle, CFA

Establishment date: January 2005

## Risk level

## Objectives of the Account

- Long term capital growth through investments in securities of continental Europe and the United Kingdom
- Conforms to investment horizons that are sufficiently distant to tolerate the volatility of the market values

## Investment style

Blend

## Credited return

100% of the net return of the underlying fund, less current annual fees.

Current annual fees: 0.00%

Maximum annual fees: 0.50%

## Year By Year Returns

This chart shows you the Account's annual performance and how an investment made on January 1 would have changed by December 31.

## Past Performance

This graph shows you how a \$10,000 investment in this Account would have changed in value after deduction of current annual fees.

## Commentary

The U.S. Dividend Growth (iA) Account reflects the performance of the IA Clarington U.S. Dividend Growth Fund, A Series. The objective of the Fund is to achieve superior long term capital appreciation consistent with the protection of the Fund's capital. The Fund will invest primarily in a diversified portfolio of equity securities of large capitalization U.S. corporations, which, in the opinion of the investment manager, offer above-average growth prospects.

## Investment Advisor

	61.37%

## Commentary

The Global Health Care (Renaissance) Account reflects the performance of the Renaissance Global Health Care Fund, Class A. The Fund is composed of securities of companies in health-related sectors, specifically in the medical technology, biotechnology, health care and pharmaceutical product industries. Following a bottom-up analysis, the manager builds the portfolio stock by stock within each industry group. The manager favours a value style in a growth sector. Although the Fund may be invested in the securities of companies listed on stock markets anywhere in the world, it is primarily made up of the stocks of U.S. and European companies.

# Active Management Smoothed Return Diversified Account (SRDA)

Série IV Plus

As at September 30, 2023

## Target asset mix of the portfolio

## Common shares

The common share portfolio is invested primarily in the shares of large capitalization companies around the world. The portfolio is also well diversified across several sectors of the economy in order to diversify risk while taking advantage of various growth opportunities.

## Government and corporate bonds

The government and corporate bond portfolio targets geographic diversification through credit rating and maturity. For the entire bond portfolio, we aim for an average duration of between 5 and 15 years and an average investment grade credit rating.

## Alternative assets

### Commercial mortgages

The commercial mortgage portfolio consists primarily of mortgages on multi-residential, retail, industrial and office properties. Our goal is to build a diversified portfolio through a rigorous selection process.

### Private debt

We primarily target mid-term and diversified investments like infrastructures and favour high-quality borrowers. Private debt is not traded in public markets and its yield is higher than comparable corporate bonds.

### Real estate investments

iA Financial Group owns and manages an impressive and well-diversified portfolio of real estate assets. This asset class provides a stable income base as well as protection against inflation.

### Private equity and infrastructure

Capital and infrastructure investments are made in unlisted companies around the world, mainly in renewable energy, transportation and telecommunications. Generally, they offer superior returns and a lower volatility profile relative to public equities.

## Preferred shares

Preferred shares are an asset class that provides dividends which are generally stable and predictable over time. The selection of preferred shares is based on the following principles: the level and stability of the dividends over time, the sector of exposure and the quality of the issuer.

## Investment Advisor

Management team composed of several managers

Establishment date: March 2022

Current annual fees: 1.25%

Maximum annual fees: 2.00%

## Échelle de risque

## Objectives of the Account

- Optimize the asset allocation to provide attractive long-term return potential while minimizing risks through an actively managed approach to investment diversification.
- To optimize the risk/return relationship, in addition to its fixed income securities and equities, the Fund includes such assets as commercial mortgages, private debt, real estate and private equity & infrastructure, which offer various advantages, including higher returns with equal or lower risk, a low correlation with traditional asset classes, and additional portfolio diversification.

## Investment style

Strategy focused on balancing the various asset classes.

## Smoothed Return

The net credited rate for the Smoothed Return Diversified Account for a given year is equal to the declared rate for the Smoothed Return Diversified Fund (the Fund), less management fees.

Before the end of each calendar year, the Fund declared rate will be set for the forthcoming calendar year. This declared rate is based on returns earned on the Fund assets to which the company applies a smoothing formula. This formula amortizes the major fluctuations in returns (positive and negative) and provides a stable, low-volatility declared rate from year to year. The declared rate for the Fund should never vary more than 0.5% from one year to the next.

The net rate credited for the SRDA is subject to a minimum of 0% and a maximum of 8.5%. If, in a given year, the net credited rate is capped at 8.5%, the portion of the return that exceeds 8.5% for that year will be retained in the fund and used in subsequent years to increase the credited rate.

## Guaranteed Credited Rate<sup>1</sup>

This table shows the guaranteed rate after deduction of current annual fees.

Period	Guarantee
2022	3.25%
January 1, 2023 and thereafter	Declared rate for the Fund less management fees

<sup>1</sup> In December of each year, the credited rate established for the upcoming year will be published in the Rate Schedule – Life Insurance available in the Document Centre of the Advisor Centre.

## Market Value Adjustment (MVA)

Some types of transactions may trigger a market value adjustment (MVA). To find out the current MVA factor, advisors can refer to the Rate Schedule – Life Insurance available in the Document Centre in Advisor Centre.

Past performance is not a guarantee of future returns.
