

COMMUNIQUÉ

To Group Insurance plan administrators
Drug management

Wegovy drug coverage

We wish to inform you that Wegovy¹ will be covered as of November 15, 2024, in plans that include coverage of weight management drugs.

To promote optimal use of this drug while ensuring the long-term sustainability of group drug plans, reimbursement will be subject to prior authorization.

Weight management drug coverage

Preserving the physical and mental health of plan members through continued access to a comprehensive plan that meets their needs is an integral part of our PharmAssist drug management program.

That is why, for the health of these persons, we recommend that treatments for obesity and weight management be covered by drug plans, according to pre-established criteria.

As these treatments have an important preventive component, we believe that reducing excess weight can have significant, positive benefits for their health and, by the same token, for group insurance plan expenses.

If you have any questions, please contact your advisor or your iA Financial Group Account Executive.

PharmAssist is included in all our drug plans as part of our comprehensive offering of drug management solutions for our group insurance clients.

¹ WEGOVY® (semaglutide injection) is indicated as an adjunct to a reduced calorie diet and increased physical activity for chronic weight management.

You, as the plan administrator, have an important role to play in informing your plan members about their group insurance plan. We also look to your support to give them all explanatory and administrative documents upon enrolment or upon request. We will help you show them where they can consult this documentation if it is not available in hard copy. If you have any questions, please feel free to consult your administrator's guide or to contact your local Account Executive or Client Relationship Manager.

This communiqué and past publications are also available on our website ia.ca.
